

Reinsurance Solutions

CatNet[®] Suite

Evolve your risk mitigation strategy with Swiss Re's location intelligence

Your Needs

High-resolution NatCat data

Reduce time spent on gathering information from various data sources with different granularities.

Single source of location intelligence

Access reliable scientific data on hazards, risk exposures, catastrophic events and losses - ensuring an efficient P&C risk analysis and selection at any time.

Swift accumulation control

Gauge and mitigate accumulation losses caused due to increasing urbanisation and climate change.

Efficient underwriting processes

Integrate location intelligence across the value chain, saving time and fostering collaboration.

Our Solution

Global Coverage

Benefit from one solution with globally consistent, high-resolution NatCat data to measure and benchmark your exposure for any location in the world.

1 tool powered by 20 years of experience

A user-friendly and intuitive Geo tool that is accessible 24/7 - built on Swiss Re's extensive experience of supporting clients.

10 000 locations within minutes

Combining your portfolio with Swiss Re's hazard data allows you to identify issues that would have otherwise remained undetected.

Seamless support across the insurance value chain

- Property underwriters for large industrial and selected small business - or treaties
- Risk engineers doing surveys
- Claims managers analysing the impact of an event
- Risk managers assessing the potential risk accumulation

Impact & Beyond

Improved risk assessment for better bottom-line results.

Sound product development to facilitate growth.

Increased transparency over different markets.

Swift processes to reduce cost with tremendous efficiency and accuracy.

We've updated our underwriting guidelines to be in line with CatNet[®] features and as a result our loss ratios have really improved.

– William Berg,
Underwriting Manager,
APRIL Immobilier

Swiss Re CatNet® Suite

CatNet® Basic

Assess
your risk exposure

Basic Online Geo Intelligence Tool

Visualise
basic hazards

Analyse
NatCat exposure for single sites
or small location sets (up to 300
locations in 1 file)

Manage
single site or multi-location risks

CatNet® Premium

Deep dive
into exposure details

Enhanced Online Geo Intelligence Tool

Visualise
basic hazards, additional high
resolution hazard data sets also
beyond NatCat and near real-time
catastrophic event data

Analyse & Deep Dive
NatCat & other exposures for single
sites & larger location sets (up to
10 000 locations and multiple files)

Manage & Mitigate
today's and tomorrow's NatCat
risks effectively

CatNet® API

Integrate
high quality hazard data
into your own system

Data As A Service

Integrate
Swiss Re's hazard and event data
sets directly into your own tools
and applications

Visualise & Analyse
the exposure data immediately from
your own tool and start making
informed decisions right away

Streamline
processes from underwriting to
claims management with CatNet®
data as a part of your single
integrated workflow

CatNet® hazard data frequency and/or severity

Wind

Volcano

Hail

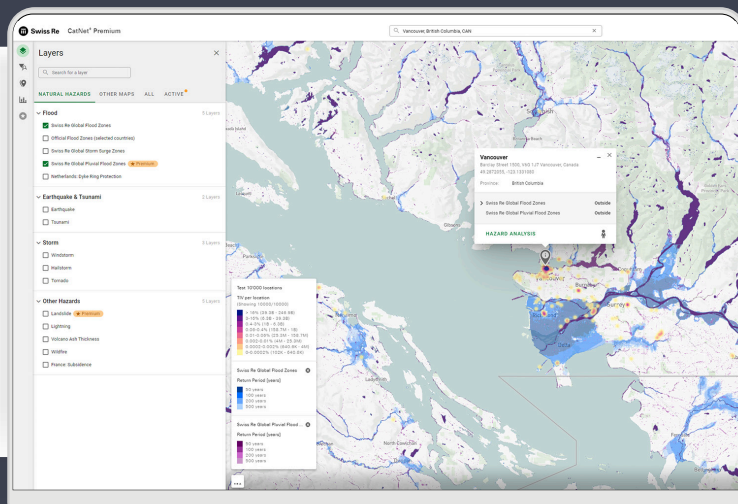

Wildfire

Tornado

Earthquake

CatNet® hazard data frequency and/or severity

Lightning

Landslide

Fluvial
Flood

Tsunami

Pluvial
Flood

Storm
Surge
