

Swiss Re Impact+

From data to disruption
within seconds.

Your Needs

Quality data

While big data is growing exponentially, majority of it is often disaggregated, unstructured and generally underutilised. Access to reliable and accurate statistical data is the need of the hour.

Tools & models

Cost, capabilities and capacity required to build future-ready tools now are becoming a big threat for smaller carriers.

One platform for all insurance processes

Data integrated across insurance value chain has become critical for increased efficiency and agility.

Powered by Swiss Re Impact+

100+ data sets

One of the largest risk and insurance data pools worldwide tailored to local markets.

Granularity in pricing & portfolio steering – leveraging your and our portfolio data, but also external data sources.

Proprietary models and tools

Broad range of analytical tools and methods for more precise pricing, market growth strategies and the assessment of your risk exposure.

Seamless support across insurance value chain

One log-in to access Swiss Re and third-party risk models and state of the art visualisations for insights across the value chain.

Seamless operation between applications, tools and data reuse across 170 countries.

= Your Next

6%

Loss ratio improvement
for complex and low performing liability portfolios.

\$50mn

Premium generation
by growing commercial middle market.

\$2mn
