Qualitative Analysis of Solvency Ratio (Period over Period)

- The LIMAT Total Ratio decreased from 125% (December 31, 2024) to 120% (December 31, 2025). The Total Ratio is well above the supervisory target level and within the Branch's operational target range.
- The 2025 change in the Available Margin (C) was mainly driven by: excess capital repatriated back to the Head Office, the higher interest rate environment, and annual basis changes.
- The 2025 change in the Surplus Allowance and Eligible Deposits (D) was mainly driven by: annual basis changes, the higher interest rate environment, and an increase in Eligible Deposits.
- The 2025 change in the Required Margin (E) was mainly driven by: normal course movements in the business, in conjunction with annual basis changes and market movements.
