Roland Metzler is a highly accomplished civil engineer and project management professional with a wealth of experience in managing complex international projects in the field of water supply and wastewater.

Throughout his professional journey, Roland has showcased a diverse skill set and comprehensive knowledge. He excels in operational and personnel management, along with being a seasoned project manager. His proficiency extends to quality assurance, project development, financial engineering, and environmental analysis. His extensive experience in water supply, wastewater treatment, waste management, renewable energies, and contaminated sites adds to his multifaceted expertise.

Roland's international experience is noteworthy. He has been deeply involved in coordinating and managing international projects, liaising with stakeholders, and ensuring the successful execution of turnkey plants and systems. His familiarity with FIDIC Red and Yellow Book contracts is a testament to his understanding of the intricacies of project management.

His work portfolio spans across a diverse range of countries, including Albania, Austria, Bosnia-Herzegovina, Bulgaria, China, Croatia, Georgia, Germany, Ghana, Kosovo, Moldova, Mozambique, Romania, Saudi Arabia, Senegal, Serbia, Slovenia, Sri Lanka, Swaziland, Switzerland, Tajikistan, Tanzania, Turkey, and Ukraine.
