¹ Insurance service expense (net) / insurance revenue (net); 2026 target assumes discounting benefit of ~9%

² (Insurance service expense (gross) + reinsurance result + non-directly attributable expenses) / insurance revenue (gross); 2026 target assumes discounting benefit of ~4%

³ 2026 target assumes CSM release of ~8-9% of opening balance and risk adjustment release of ~9% of opening balance

⁴ Subject to achievement of FY 2025 Group net income target and BoD approval

Swiss Re maintains a strong capital position

Group SST ratio¹ development (USD bn)

¹ Group SST ratio = available capital / required capital = SST risk-bearing capital (RBC) / SST target capital

² Amended, given the implementation of the methodology to derive the SST target capital required correction. In the past, the expected change in SST RBC, which is deducted from total risk to derive the SST target capital, did not factor in the discounting of the expected SST RBC when implemented

³ Estimated Group SST ratio as of 1 October 2025. The Group SST ratio is filed with FINMA periodically and is subject to review

Sustainable annual share buyback to complement ordinary dividend

- the Group’s ability to achieve its strategic objectives;
- legal actions or regulatory investigations or actions, including in respect of industry requirements or business conduct rules of general applicability, the intensity and frequency of which may also increase as a result of social inflation;

- the Group’s ability to realise amounts on sales of securities on the Group’s balance sheet equivalent to their values recorded for accounting purposes;

- matters negatively affecting the reputation of the Group, its board of directors or its management;
- the lowering, loss, giving up of, or the decision not to participate in one of the financial strength or other ratings of one or more companies in the Group, and developments adversely affecting its ability to achieve improved ratings;
