

Key Innovation

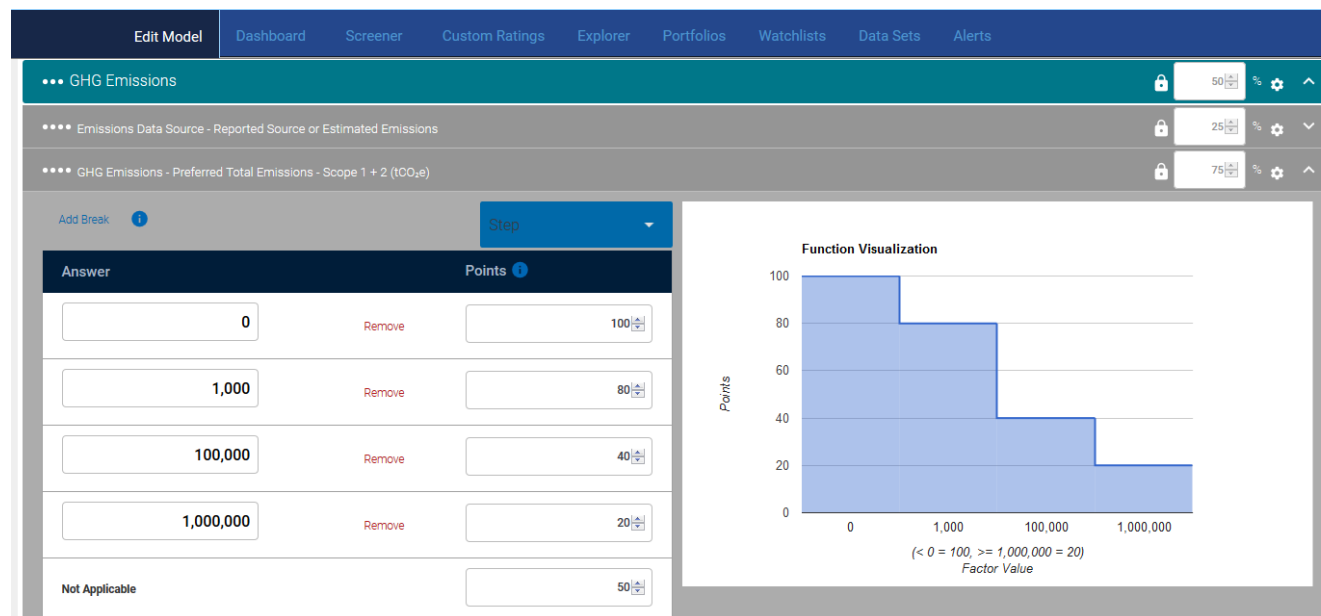

ALLOW CUSTOMIZED
AND FLEXIBLE
SCORING MODELS
BASED ON NEAR-
TIME DATA

Challenge:

- ESG ratings include normative judgements (e.g. trade-off: E vs. S vs. G)
- Several studies show that views from ESG providers do not always correlate

Solution:

- Role as ESG provider: provide a reference view but...
- ... enable actors to easily formulate and implement their own view

FUTURE DEVELOPMENT

What are future areas of research and development?

Financial materiality: How to integrate ESG into standard financial models?

Value chain: How to best assess the value chain impacts of products and services?

Impact measurement: How to create reliable impact metrics linking to changes in the real economy?
