<sup>1</sup> The CPCI was reclassified from equity to short-term debt upon termination on 4 November 2010. The final cash settlement was made in January 2011.

<sup>2</sup> In 2011 dividends to shareholders were paid in the form of a withholding tax exempt repayment of legal reserves from capital contributions.

<sup>3</sup> The Group adopted a new accounting pronouncement, ASU No. 2009-17 (FAS167), an update to Topic 810 – Consolidation, as of 1 January 2010, which resulted in the full consolidation of certain VIEs. This resulted in a transition impact to retained earnings of USD 60 million and to net unrealised gains/losses of USD -35 million.

The accompanying notes are an integral part of the Group financial statements.

# Notes to the Group financial statements

## 1 Organisation and summary of significant accounting policies

### Nature of operations

The Swiss Re Group, which is headquartered in Zurich, Switzerland, comprises Swiss Re Ltd (the parent company) and its subsidiaries (collectively, the "Swiss Re Group" or the "Group"). The Swiss Re Group is a wholesale provider of reinsurance, insurance and other insurance-based forms of risk transfer. Working through brokers and a network of more than 60 offices around the globe, its client base consists of insurance companies, mid-to-large-sized corporations and public sector clients.

### Basis of presentation

The accompanying consolidated financial statements of the Swiss Re Group have been prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP) and comply with Swiss law. All significant inter-company transactions and balances have been eliminated on consolidation.

On 17 February 2011, the Swiss Re Group announced the implementation of a new organisational structure. As a first step to create that new structure, the Swiss Re Group established a new holding company (Swiss Re Ltd) through an exchange offer. Swiss Reinsurance Company Ltd ("Swiss Reinsurance Company") shareholders were offered the opportunity to exchange their shares in Swiss Reinsurance Company for new shares in the holding company on a one-for-one basis. Effective 20 May 2011, Swiss Re Ltd became the holding company of the Swiss Re Group, and effective 13 December 2011, Swiss Reinsurance Company became a wholly owned subsidiary of Swiss Re Ltd. Because holders of Swiss Re Ltd shares had the same beneficial ownership interests before and after the exchange offer, the exchange offer has been accounted for in a manner similar to a transaction between entities under common control (and not as a purchase event). The exchange offer did not have an impact on the consolidated financial statements of the Swiss Re Group for the periods presented because the financial statements are presented as if Swiss Re Ltd had been the parent company for such periods.

Starting with the second quarter of 2011, the scope of the Swiss Re Group consolidated financial statements and the Swiss Reinsurance Company consolidated financial statements differs due to the inclusion of the ultimate holding company, Swiss Re Ltd, and a subsidiary, Swiss Re Specialised Investments Holdings (UK) Ltd ("SRSIH"), which is held directly by Swiss Re Ltd, in the Swiss Re Group financial statements. Neither Swiss Re Ltd nor SRSIH is included in the Swiss Reinsurance Company consolidated financial statements.

The new corporate structure will be reflected in the Group financial statements beginning with the first quarter of 2012. As a result, the segmental disclosures will change to reflect the way the Group manages its business activities. The new Group reporting structure will consist of the Reinsurance segment, with separate disclosure of the Property & Casualty and Life & Health units, the Corporate Solutions segment and the Admin Re<sup>®</sup> segment. The Group items segment will include the Group's holding company (Swiss Re Ltd), and certain Treasury activities, as well as the remaining non-core activities that have been in run-off since November 2007. Further changes in the course of 2012 to the legal entity structure of the Swiss Re Group, to the extent operations within the Swiss Reinsurance Company consolidated group are transferred to Swiss Re Ltd, will lead to additional differences between the Swiss Re Group consolidated financial statements and Swiss Reinsurance Company consolidated financial statements.

### Principles of consolidation

The Group's financial statements include the consolidated financial statements of Swiss Re Ltd and its subsidiaries. Voting entities which Swiss Re Ltd directly or indirectly controls through holding a majority of the voting rights are consolidated in the Group's accounts. Variable interest entities (VIEs) are consolidated when the Swiss Re Group is the primary beneficiary. The Group is the primary beneficiary when it has power over the activities that impact the VIE's economic performance and at the same time has the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE. Companies which the Group does not control, but over which it directly or indirectly exercises significant influence, are accounted for using the equity method and are included in other invested assets. The Swiss Re Group's share of net profit or loss in investments accounted for under the equity method is included in net investment income. Equity and net income of these companies are adjusted as necessary to be in line with the Group's accounting policies. The results of consolidated subsidiaries and investments accounted for using the equity method are included in the financial statements for the period commencing from the date of acquisition.

### Use of estimates in the preparation of financial statements

The preparation of financial statements requires management to make significant estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses as well as the related disclosure including contingent assets and liabilities. The Swiss Re Group's liabilities for unpaid claims and claim adjustment expenses and policy benefits for life and health include estimates for premium, claim and benefit data not received from ceding companies at the date of the financial statements. In addition, the Group uses certain financial instruments and invests in securities of certain entities for which exchange trading does not exist. The Group determines these estimates based on historical information, actuarial analyses, financial modelling, and other analytical techniques. Actual results could differ significantly from the estimates described above.

### Foreign currency remeasurements and translation

Transactions denominated in foreign currencies are remeasured to the respective subsidiary's functional currency at average quarterly exchange rates. Monetary assets and liabilities are remeasured to the functional currency at closing exchange rates, whereas non-monetary assets and liabilities are remeasured to the functional currency at historical rates. Remeasurement gains and losses on monetary assets and liabilities and trading securities are reported in earnings. Remeasurement gains and losses on available-for-sale securities, investments in consolidated subsidiaries and investments accounted for using the equity method are reported in shareholders' equity.

For consolidation purposes, assets and liabilities of subsidiaries with functional currencies other than US dollars are translated from the functional currency to US dollars at closing rates. Revenues and expenses are translated at average exchange rates. Translation adjustments are reported in shareholders' equity.

### Valuation of financial assets

The fair value of the majority of the Group's financial instruments is based on quoted prices in active markets or observable inputs. These instruments include government and agency securities, commercial paper, most investment-grade corporate debt, most high-yield debt securities, exchange-traded derivative instruments, most mortgage-backed and asset-backed securities and listed equity securities. In markets with reduced or no liquidity, spreads between bid and offer prices are normally wider compared to spreads in highly liquid markets. Such market conditions affect the valuation of certain asset classes of the Group, such as some asset-backed securities as well as certain derivative structures referencing such asset classes.

The Group considers both the credit risk of its counterparties, and own risk of non-performance in the valuation of derivative instruments and other over-the-counter financial assets. In determining the fair value of these financial instruments, the assessment of the Group's exposure to the credit risk of its counterparties incorporates consideration of existing collateral and netting arrangements entered into with each counterparty. The measure of the counterparty credit risk is estimated with incorporation of the observable credit spreads, where available, or credit spread estimates derived based on the benchmarking techniques where market data is not available. The impact of the Group's own risk of non-performance is analysed in the manner consistent with the aforementioned approach, with consideration of the Group's observable credit spreads. The value representing such risk is incorporated into the fair value of the financial instruments (primarily derivatives), in a liability position as of the measurement date. The change in this adjustment from period to period is reflected in realised gains and losses in the income statement.

For assets or derivative structures at fair value, the Group uses market prices or inputs derived from market prices. A separate internal price verification process, independent of the trading function, provides an additional control over the market prices or market input used to determine the fair values of such assets. Whilst management considers that appropriate values have been ascribed to such assets, there is always a level of uncertainty and judgment over these valuations. Subsequent valuations could differ significantly from the results of the process described above. The Group may become aware of counterparty valuations, either directly through the exchange of information or indirectly, for example, through collateral demands. Any implied differences are considered in the independent price verification process and may result in adjustments to initially indicated valuations. As of 31 December 2011, the Group had not provided any collateral on financial instruments in excess of its own market value estimates.

### Investments

The Group's investments in fixed income and equity securities are classified as available-for-sale (AFS) or trading. Fixed income securities AFS and equity securities AFS are carried at fair value, based on quoted market prices, with the difference between original cost and fair value being recognised in shareholders' equity. Trading fixed income and equity securities are carried at fair value with unrealised gains and losses being recognised in earnings.

The cost of equity securities AFS is reduced to fair value, with a corresponding charge to realised investment losses if the decline in value, expressed in functional currency terms, is other than temporary. Subsequent recoveries of previously recognised impairments are not recognised.

For debt securities AFS which are other-than-temporarily impaired and for which there is not an intention to sell, the impairment is separated into (i) the estimated amount relating to credit loss, and (ii) the amount relating to all other factors. The estimated credit loss amount is recognised in earnings, with the remainder of the loss amount recognised in other comprehensive income. In cases where there is an intention or requirement to sell, the accounting of the other-than-temporary impairment is the same as for equity securities AFS described above.

Interest on fixed income securities is recorded in net investment income when earned and is adjusted for the amortisation of any purchase premium or discount. Dividends on equity securities are recorded on the basis of the ex-dividend date. Realised gains and losses on sales are included in earnings and are calculated using the specific identification method.

Policy loans, mortgages and other loans are carried at amortised cost. Interest income is recognised in accordance with the effective yield method.

Investment in real estate that the Group intends to hold for the production of income is carried at depreciated cost, net of any write-downs for impairment in value. Impairment in value is recognised if the sum of the estimated future undiscounted cash flows from the use of the real estate is lower than its carrying value. Impairment in value, depreciation and other related charges or credits are included in net investment income. Investment in real estate held for sale is carried at the lower of cost or fair value, less estimated selling costs, and is not depreciated. Reductions in the carrying value of real estate held for sale are included in realised investment losses.

Short-term investments are carried at amortised cost, which approximates fair value. The Group considers highly liquid investments with a remaining maturity at the date of acquisition of one year or less, but greater than three months, to be short-term investments.

Other invested assets include affiliated companies, equity accounted companies, derivative financial instruments, collateral receivables, securities purchased under agreement to resell, and investments without readily determinable fair value (including limited partnership investments). Investments in limited partnerships where the Group's interest equals or exceeds 3% are accounted for using the equity method. Investments in limited partnerships where the Group's interest is below 3% and equity investments in corporate entities which are not publicly traded are accounted for at estimated fair value with changes in fair value recognised as unrealised gains/losses in shareholders' equity.

The Group enters into security lending arrangements under which it loans certain securities in exchange for collateral and receives securities lending fees. The Group's policy is to require collateral, consisting of cash or securities, equal to at least 102% of the carrying value of the securities loaned. In certain arrangements, the Group may accept collateral of less than 102% if the structure of the overall transaction offers an equivalent level of security. Cash received as collateral is recognised along with an obligation to return the cash. Securities received as collateral that can be sold or repledged are also recognised along with an obligation to return those securities. Security lending fees are recognised over the term of the related loans.

#### **Derivative financial instruments and hedge accounting**

The Group uses a variety of derivative financial instruments including swaps, options, forwards and exchange-traded financial futures for the Group's trading and hedging strategy in line with the overall risk management strategy. Derivative financial instruments are primarily used as a means of managing exposure to price, foreign currency and/or interest rate risk on planned or anticipated investment purchases, existing assets or liabilities and also to lock in attractive investment conditions for funds which become available in the future. The Group recognises all of its derivative instruments on the balance sheet at fair value. Derivatives that are not designated as hedging instruments are adjusted to fair value through earnings.

If the derivative is designated as a hedge of the fair value of assets or liabilities, changes in the fair value of the derivative are recognised in earnings, together with changes in the fair value of the related hedged item. If the derivative is designated as a hedge of the variability in expected future cash flows related to a particular risk, changes in the fair value of the derivative are reported in other comprehensive income until the hedged item is recognised in earnings. The ineffective portion of the hedge is recognised in earnings. When hedge accounting is

discontinued on a cash flow hedge, the net gain or loss remains in accumulated other comprehensive income and is reclassified to earnings in the period in which the formerly hedged transaction is reported in earnings. When the Group discontinues hedge accounting because it is no longer probable that a forecasted transaction will occur within the required time period, the derivative continues to be carried on the balance sheet at fair value, and gains and losses that were previously recorded in accumulated other comprehensive income are recognised in earnings.

The Group recognises separately derivatives that are embedded within other host instruments if the economic characteristics and risks are not clearly and closely related to the economic characteristics and risks of the host contract and if it meets the definition of a derivative if it were stand-alone.

Derivative financial instrument assets are generally included in other invested assets and derivative financial instrument liabilities are generally included in accrued expenses and other liabilities.

The Group also designates non-derivative monetary financial instruments as a hedge of the foreign currency exposure of its net investment in certain foreign operations. From the inception of the hedging relationship, remeasurement gains and losses on the designated non-derivative monetary financial instruments and translation gains and losses on the hedged net investment are reported as translation gains and losses in shareholders' equity.

#### **Cash and cash equivalents**

Cash and cash equivalents include cash on hand, short-term deposits, certain short-term investments in money market funds, and highly liquid debt instruments with a remaining maturity at the date of acquisition of three months or less.

#### **Deferred acquisition costs**

Acquisition costs, which vary with, and are primarily related to, the production of new insurance and reinsurance business, are deferred to the extent they are deemed recoverable from future gross profits. Deferred acquisition costs consist principally of commissions. Deferred acquisition costs for short-duration contracts are amortised in proportion to premiums earned. Future investment income is considered in determining the recoverability of deferred acquisition costs for short-duration contracts. Deferred acquisition costs for long-duration contracts are amortised over the life of underlying contracts. Deferred acquisition costs for universal-life and similar products are amortised based on the present value of estimated gross profits. Estimated gross profits are updated quarterly.

#### **Business combinations**

The Group applies the purchase method of accounting for business combinations. This method allocates the cost of the acquired entity to the assets and liabilities assumed based on their estimated fair values at the date of acquisition.

Admin Re<sup>®</sup> blocks of business can be acquired in different legal forms, either through an acquisition of an entity's share capital or through a reinsurance transaction. The Group's policy is to treat these transactions consistently regardless of the form of acquisition. Accordingly, the Group records the acquired assets and liabilities directly to the balance sheet. Premiums, life and health benefits and other income statement items are not recorded in the income statement on the date of the acquisition.

The underlying liabilities and assets acquired are subsequently accounted for according to the relevant GAAP guidance, including specific guidance applicable to subsequent accounting for assets and liabilities recognised as part of the purchase method of accounting, including present value of future profit, goodwill and other intangible assets.

**Acquired present value of future profits**

The acquired present value of future profits (PVFP) of business in force is recorded in connection with the acquisition of life and/or health business. The initial value is determined actuarially by discounting estimated future gross profits as a measure of the value of business acquired. The resulting asset is amortised on a constant yield basis over the expected revenue recognition period of the business acquired, generally over periods ranging up to 30 years, with the accrual of interest added to the unamortised balance at the earned rate. For universal-life and similar products, PVFP is amortised in line with estimated gross profits, and estimated gross profits are updated quarterly. The carrying value of PVFP is reviewed periodically for indicators of impairment in value. Adjustments to reflect impairment in value are recognised in earnings during the period in which the determination of impairment is made.

**Goodwill**

The excess of the purchase price of acquired businesses over the estimated fair value of net assets acquired is recorded as goodwill, which is reviewed periodically for indicators of impairment in value. Adjustments to reflect impairment in value are recognised in earnings in the period in which the determination of impairment is made.

**Other assets**

Other assets include deferred expenses on retroactive reinsurance, separate account assets, prepaid reinsurance premiums, receivables related to investing activities, real estate for own use, property, plant and equipment, accrued income, certain intangible assets and prepaid assets.

The excess of estimated liabilities for claims and claim adjustment expenses payable over consideration received in respect of retroactive property and casualty reinsurance contracts is recorded as a deferred expense. The deferred expense on retroactive reinsurance contracts is amortised through earnings over the expected claims-paying period.

Separate account assets are carried at fair value. The investment performance (including interest, dividends, realised gains and losses and changes in unrealised gains and losses) of separate account assets and the corresponding amounts credited to the contract holder are offset to zero in the same line item in earnings.

Real estate for own use, property, plant and equipment are carried at depreciated cost.

**Capitalised software costs**

External direct costs of materials and services incurred to develop or obtain software for internal use, payroll and payroll-related costs for employees directly associated with software development and interest cost incurred while developing software for internal use are capitalised and amortised on a straight-line basis through earnings over the estimated useful life.

**Deferred income taxes**

Deferred income tax assets and liabilities are recognised based on the difference between financial statement carrying amounts and the corresponding income tax bases of assets and liabilities using enacted income tax rates and laws. A valuation allowance is recorded against deferred tax assets when it is deemed more likely than not that some or all of the deferred tax asset may not be realised.

**Unpaid claims and claim adjustment expenses**

Liabilities for unpaid claims and claim adjustment expenses for property and casualty reinsurance contracts are accrued when insured events occur and are based on the estimated ultimate cost of settling the claims, using reports and individual case estimates received from ceding companies. A provision is also included for claims incurred but not reported, which is developed on the basis of past experience adjusted for current trends and other factors that modify past experience. The establishment of the appropriate level of reserves is an inherently uncertain process involving estimates and judgments made by management, and therefore there can be no assurance that ultimate claims and claim adjustment expenses will not exceed the loss reserves currently established. These estimates are regularly reviewed, and adjustments for differences between estimates and actual payments for claims and for changes in estimates are reflected in income in the period in which the estimates are changed or payments are made.

The Group does not discount liabilities arising from prospective property and casualty insurance and reinsurance contracts, including liabilities which are discounted for US statutory reporting purposes. Liabilities arising from property and casualty insurance and reinsurance contracts acquired in a business combination are initially recognised at fair value in accordance with the purchase method of accounting.

Experience features which are directly linked to a reinsurance asset or liability are classified in a manner that is consistent with the presentation of that asset or liability.

#### **Liabilities for life and health policy benefits**

Liabilities for life and health policy benefits from reinsurance business are generally calculated using the net level premium method, based on assumptions as to investment yields, mortality, withdrawals, lapses and policyholder dividends. Assumptions are set at the time the contract is issued or, in the case of contracts acquired by purchase, at the purchase date. The assumptions are based on projections from past experience, making allowance for possible adverse deviation. Interest assumptions for life and health reinsurance benefits liabilities range from 1% to 11%. Assumed mortality rates generally rest upon experience multiples applied to the actuarial select and ultimate tables based on industry experience. Liabilities for policy benefits are increased if it is determined that future cash flows, including investment income, are insufficient to cover future benefits and expenses.

The liability for accident and health policy benefits consists of active life reserves and the estimated present value of the remaining ultimate net costs of incurred claims. The active life reserves include unearned premiums and additional reserves. The additional reserves are computed on the net level premium method using assumptions for future investment yield, mortality and morbidity experience. The assumptions are based on projections of past experience and include provisions for possible adverse deviation.

#### **Policyholder account balances**

Policyholder account balances relate to universal life-type contracts and investment contracts. Interest crediting rates for policyholder account balances range from 2% to 9%.

Universal life-type contracts are long-duration insurance contracts, providing either death or annuity benefits, with terms that are not fixed and guaranteed.

Investment contracts are long-duration contracts that do not incorporate significant insurance risk, ie there is no mortality and morbidity risk, or the mortality and morbidity risk associated with the insurance benefit features offered in the contract is of insignificant amount or remote probability. Amounts received as payment for investment contracts are reported as policyholder account balances. Related assets are included in general account assets.

Amounts assessed against policyholders for mortality, administration and surrender are shown as fee income. Amounts credited to policyholders are shown as interest credited to policyholders. Investment income and realised investment gains and losses allocable to policyholders are included in net investment income and net realised investment gains/losses.

#### **Funds held assets and liabilities**

Funds held assets and liabilities include amounts retained by the ceding company or the Group for business written on a funds-withheld basis, and amounts arising from the application of the deposit method of accounting to insurance and reinsurance contracts that do not indemnify the ceding company or the Group against loss or liability relating to insurance risk.

Under the deposit method of accounting, the deposit asset or liability is initially measured based on the consideration paid or received. For contracts that transfer neither significant timing nor underwriting risk, and contracts that transfer only significant timing risk, changes in estimates of the timing or amounts of cash flows are accounted for by recalculating the effective yield. The deposit is then adjusted to the amount that would have existed had the new effective yield been applied since the inception of the contract. The revenue and expense recorded for such contracts is included in net investment income. For contracts that transfer only significant underwriting risk, once a loss is incurred, the deposit is adjusted by the present value of the incurred loss. At each subsequent balance sheet date, the portion of the deposit attributable to the incurred loss is recalculated by discounting the estimated future cash flows. The resulting changes in the carrying amount of the deposit are recognised in claims and claim adjustment expenses.

**Premiums**

Property and casualty reinsurance premiums are recorded when written and include an estimate for written premiums receivable at period end. Premiums earned are generally recognised in income over the contract period in proportion to the amount of reinsurance provided. Unearned premiums consist of the unexpired portion of reinsurance provided. Life reinsurance premiums are earned when due. Related policy benefits are recorded in relation to the associated premium or gross profits so that profits are recognised over the expected lives of the contracts.

Life and health reinsurance premiums for group coverages are generally earned over the term of the coverage. For group contracts that allow experience adjustments to premiums, such premiums are recognised as the related experience emerges.

**Reinsurance ceded**

The Group uses retrocession arrangements to increase its aggregate underwriting capacity, to diversify its risk and to reduce the risk of catastrophic loss on reinsurance assumed. The ceding of risks to retrocessionaires does not relieve the Group of its obligations to its ceding companies. The Group regularly evaluates the financial condition of its retrocessionaires and monitors the concentration of credit risk to minimise its exposure to financial loss from retrocessionaires' insolvency. Premiums and losses ceded under retrocession contracts are reported as reductions of premiums earned and claims and claim adjustment expenses. Amounts recoverable for ceded short- and long-duration contracts, including universal life-type and investment contracts, are reported as assets in the accompanying consolidated balance sheet.

The Group provides reserves for uncollectible amounts on reinsurance balances ceded, based on management's assessment of the collectibility of the outstanding balances.

**Receivables**

Premium and claims receivables which have been invoiced are accounted for at face value. Together with assets arising from the application of the deposit method of accounting that meet the definition of financing receivables they are regularly assessed for impairment. Evidence of impairment is ageing and financial difficulties of the counterparty. Allowances are set up on the net balance, meaning all balances related to the same counterparty are considered. The amount of the allowance is set up in relation to the time a receivable has been due and financial difficulties of the debtor, and can be as high as the outstanding net balance.

**Pensions and other post-retirement benefits**

The Group accounts for its pension and other post-retirement benefit costs using the accrual method of accounting. Amounts charged to expense are based on periodic actuarial determinations.

**Share-based payment transactions**

The Group has a long-term incentive plan, a fixed option plan, a restricted share plan, and an employee participation plan. These plans are described in more detail in Note 12. The Group accounts for share-based payment transactions with employees using the fair value method. Under the fair value method, the fair value of the awards is recognised in earnings over the vesting period.

For share-based compensation plans which are settled in cash, compensation costs are recognised as liabilities, whereas for equity-settled plans, compensation costs are recognised as an accrual to additional paid-in capital within shareholders' equity.

**Treasury shares**

Treasury shares are reported at cost in shareholders' equity. Treasury shares also include stand-alone derivative instruments indexed to the Group's shares that meet the requirements for classification in shareholders' equity.

**Earnings per common share**

Basic earnings per common share are determined by dividing net income available to shareholders by the weighted average number of common shares entitled to dividends during the year. Diluted earnings per common share reflect the effect on earnings and average common shares outstanding associated with dilutive securities.

**Subsequent events**

Subsequent events for the current reporting period have been evaluated up to 15 March 2012. This is the date on which the financial statements are available to be issued.

**Recent accounting guidance**

In January 2010, the FASB issued "Improving Disclosures about Fair Value Measurements" (ASU No. 2010-06), an update to Topic 820 – Fair Value Measurements and Disclosures. This new standard implements additional disclosure requirements for the three fair value levels. As required by the update, the Group adopted some of the requirements as of 1 January 2010. The remaining requirements were adopted as of 1 January 2011 and can be found in Note 3.

In December 2010, the FASB issued "When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts" (ASU No. 2010-28), an update to Topic 350 – Intangibles – Goodwill and Other. This update provides guidance under what circumstances a company is required to perform step 2 of the goodwill impairment test for reporting units with zero or negative carrying amounts. The Group adopted this guidance as of 1 January 2011. The adoption did not have an impact on the Group's financial statements.

Also in December 2010, the FASB issued "Disclosure of Supplementary Pro Forma Information for Business Combinations" (ASU No. 2010-29), an update to Topic 805 – Business Combinations. This update specifies that an entity should disclose revenue and earnings of the combined entity as though the business combinations that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. The Group adopted this update as of 1 January 2011. The adoption did not have an impact on the Group's financial statements.

In April 2011, the FASB issued "A Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring" (ASU No. 2011-02), an update to Topic 310 – Receivables. This update provides clarifications on the determination whether a restructuring of debt constitutes a troubled debt restructuring. The Group adopted this guidance as of 1 July 2011. The adoption did not have an impact on the Group's financial statements.

In October 2010, the FASB issued "Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts" (ASU No. 2010-26), an update to Topic 944 – Financial Services – Insurance. This new guidance limits the definition of deferrable acquisition costs to costs directly related to the successful acquisition or renewal of insurance contracts. The Group will adopt ASU No. 2010-26 in the first quarter of 2012. Swiss Re does not expect that the adoption will have a material impact on the Group's financial statements.

## 2 Investments

### Investment income

Net investment income by source (including unit-linked and with-profit business) was as follows:

USD millions	2010	2011
Fixed income securities	4 031	3 851
Equity securities	509	662
Policy loans, mortgages and other loans	428	405
Investment real estate	188	213
Short-term investments	88	104
Other current investments	-32	15
Share in earnings of equity-accounted investees	351	286
Cash and cash equivalents	102	101
Deposits with ceding companies	513	478
<b>Gross investment income</b>	<b>6 178</b>	<b>6 115</b>
Investment expenses	-591	-547
Interest charged for funds held	-165	-99
<b>Net investment income</b>	<b>5 422</b>	<b>5 469</b>

Dividends received from investments accounted for using the equity method were USD 86 million and USD 64 million for 2010 and 2011, respectively.

Net investment income includes income on unit-linked and with-profit business, which is credited to policyholders.

USD millions	2010	2011
Unit-linked investment income	593	685
With-profit investment income	145	158

### Realised gains and losses

Realised gains and losses for fixed income, equity securities and other investments (including unit-linked and with-profit business) were as follows:

USD millions	2010	2011
Fixed income securities available-for-sale:		
Gross realised gains	2 193	2 598
Gross realised losses	-1 149	-612
Equity securities available-for-sale:		
Gross realised gains	22	96
Gross realised losses	-1	-234
Other-than-temporary impairments	-423	-258
Net realised investment gains/losses on trading securities	108	478
Change in net unrealised investment gains/losses on trading securities	2 372	-1 063
Other investments:		
Net realised/unrealised gains/losses	213	-950
Foreign exchange gains/losses	-552	333
<b>Net realised investment gains/losses</b>	<b>2 783</b>	<b>388</b>

Proceeds from sales of fixed income securities available-for-sale amounted to USD 118 947 million and USD 115 775 million for 2010 and 2011, respectively. Sales of equity securities available-for-sale were USD 105 million and USD 2 389 million for 2010 and 2011, respectively.

Net realised investment gains/losses include net realised gains/losses on unit-linked and with-profit business, which are credited to policyholders.

USD millions	2010	2011
Unit-linked realised gains/losses	2 034	-1 272
With-profit realised gains/losses	196	26

#### Impairment on fixed income securities related to credit losses

Other-than-temporary impairments for debt securities are bifurcated between credit and non-credit components, with the credit component recognised through earnings and the non-credit component recognised in other comprehensive income. The credit component of other-than-temporary impairments is defined as the difference between a security's amortised cost basis and expected cash flows. Methodologies for measuring the credit component of impairment are aligned to market observer forecasts of credit performance drivers. Management believes that these forecasts are representative of median market expectations.

For securitised products, cash flow projection analysis is conducted integrating forward-looking evaluation of collateral performance drivers, including default rates, prepayment rates and loss severities, and deal-level features, such as credit enhancement and prioritisation among tranches for payments of principal and interest. Analytics are differentiated by asset class, product type and security-level differences in historical and expected performance. For corporate bonds and similar hybrid debt instruments, an expected loss approach based on default probabilities and loss severities expected in the current and forecast economic environment is used for securities identified as credit-impaired to project probability-weighted cash flows. Expected cash flows resulting from these analyses are discounted, and net present value is compared to the amortised cost basis to determine the credit component of other-than-temporary impairments.

A reconciliation of the other-than-temporary impairment related to credit losses recognised in earnings was as follows:

USD millions	2010	2011
Balance as of 1 January	1 409	829
Credit losses for which an other-than-temporary impairment was not previously recognised	196	141
Reductions for securities sold during the period	-775	-418
Increase of credit losses for which an other-than-temporary impairment has been recognised previously, when the Group does not intend to sell, or more likely than not will not be required to sell before recovery	96	54
Impact of increase in cash flows expected to be collected	-69	-85
Impact of foreign exchange movements	-28	-6
<b>Balance as of 31 December</b>	<b>829</b>	<b>515</b>

**Investments available-for-sale**

Amortised cost or cost, estimated fair values and other-than-temporary impairments of fixed income securities classified as available-for-sale as of 31 December were as follows:

2010 USD millions	Amortised cost or cost	Gross unrealised gains	Gross unrealised losses	Other-than-temporary impairments recognised in other comprehensive income	Estimated fair value
Debt securities issued by governments and government agencies:					
US Treasury and other US government corporations and agencies	18 868	337	-539		18 666

<b>Equity securities available-for-sale</b>	<b>1 907</b>	<b>201</b>	<b>-148</b>		<b>1 960</b>

The "Other-than-temporary impairments recognised in other comprehensive income" column only includes securities with a credit-related loss recognised in earnings. Subsequent recovery in fair value of securities previously impaired in other comprehensive income is presented in the "Other-than-temporary impairments recognised in other comprehensive income" column.

**Investments trading**

Fixed income securities and equity securities classified as trading as of 31 December were as follows:

USD millions	2010	2011
Debt securities issued by governments and government agencies	8 324	4 492
Corporate debt securities	2 497	2 774
Mortgage- and asset-backed securities	431	282
<b>Fixed income securities trading</b>	<b>11 252</b>	<b>7 548</b>
<b>Equity securities trading</b>	<b>19 513</b>	<b>16 753</b>

Fixed income securities and equity securities classified as trading as of 31 December include securities held for unit-linked and with-profit business:

USD millions	2010	2011
Fixed income securities trading held for unit-linked business	2 302	2 354
Fixed income securities trading held for with-profit business	1 648	1 741
<b>Fixed income securities trading</b>	<b>3 950</b>	<b>4 095</b>
Equity securities trading held for unit-linked business	17 405	15 231
Equity securities trading held for with-profit business	1 135	951
<b>Equity securities trading</b>	<b>18 540</b>	<b>16 182</b>

**Maturity of fixed income securities available-for-sale**

The amortised cost or cost and estimated fair values of investments in fixed income securities available-for-sale by remaining maturity are shown below. Fixed maturity investments are assumed not to be called for redemption prior to the stated maturity date. As of 31 December 2010 and 2011, USD 13 107 million and USD 10 274 million, respectively, of fixed income securities available-for-sale were callable.

USD millions	Amortised cost or cost	2010 Estimated fair value	Amortised cost or cost	2011 Estimated fair value
Due in one year or less	2 342	2 379	3 020	3 040
Due after one year through five years	16 601	16 891	19 696	20 156
Due after five years through ten years	14 628	15 189	17 955	19 072
Due after ten years	30 604	31 360	38 594	43 977
Mortgage- and asset-backed securities with no fixed maturity	15 268	15 131	7 719	7 525
<b>Total fixed income securities available-for-sale</b>	<b>79 443</b>	<b>80 950</b>	<b>86 984</b>	<b>93 770</b>

**Assets pledged**

As of 31 December 2010 and 2011, investments with the carrying value of USD 1 769 million and USD 1 961 million, respectively, were on deposit with regulatory agencies in accordance with local requirements.

As of 31 December 2010 and 2011, investments (including cash and cash equivalents) with a carrying value of approximately USD 8 573 million and USD 7 954 million, respectively, were placed on deposit or pledged to secure certain reinsurance liabilities.

As of 31 December 2010 and 2011, securities of USD 12 802 million and USD 7 823 million, respectively, were pledged as collateral in securities lending transactions and repurchase agreements. The associated liabilities of USD 1 750 million and USD 6 349 million, respectively, were recognised in accrued expenses and other liabilities.

A real estate portfolio with a carrying amount of USD 266 million serves as collateral for short-term senior operational debt of USD 695 million.

**Collateral accepted which the Group has the right to sell or repledge**

As of 31 December 2010 and 2011, the fair value of the government and corporate bond securities received as collateral was USD 6 539 million and USD 4 241 million, respectively. Of this, the amount that was sold or repledged as of 31 December 2010 and 2011 was USD nil million and USD nil million, respectively. The sources of the collateral are typically highly rated banking market counterparties.

**Unrealised losses on securities available-for-sale**

The following table shows the fair value and unrealised losses of the Group's fixed income securities, aggregated by investment category and length of time that individual securities were in a continuous unrealised loss position as of 31 December 2010 and 2011. As of 31 December 2010 and 2011, USD 25 million and USD 144 million, respectively, of the gross unrealised loss on equity securities available-for-sale relate to declines in value for less than 12 months, and USD nil million and USD 4 million, respectively, to declines in value for more than 12 months.

2010 USD millions	Less than 12 months		12 months or more		Total	
	Fair value	Unrealised losses	Fair value	Unrealised losses	Fair value	Unrealised losses

During the second quarter of 2011 the Group reviewed the categorisation of fixed income securities available-for-sale between those securities that are in an unrealised loss position for less than 12 months and more than 12 months. Based on the review, the Group determined that the split, as presented in prior-period financial statements starting in the second quarter 2010, had to be revised. The split for the 2010 year-end comparative numbers is re-presented accordingly. As a result, additional fixed income securities with a fair value of USD 4 619 million and unrealised losses of USD 788 million are now shown in the unrealised loss position for more than 12 months as of 31 December 2010. These securities were presented in the unrealised loss position for less than 12 month in prior-period financial statements. The revision has no impact on net income, net equity or the balance sheet classification of the Group.

**Mortgages, loans and real estate**

As of 31 December, the carrying values of investments in mortgages, policy and other loans, and real estate were as follows:

USD millions	2010	2011
Policy loans	3 658	<b>3 664</b>
Mortgage loans	1 337	<b>1 336</b>
Other loans	635	<b>640</b>
Investment real estate	2 040	<b>1 983</b>

The fair value of the real estate as of 31 December 2010 and 2011 was USD 3 306 million and USD 3 324 million, respectively. The carrying value of policy loans, mortgages and other loans approximates fair value.

As of 31 December 2010 and 2011, the Group's investment in mortgages and other loans included USD 270 million and USD 270 million, respectively, of loans due from employees, and USD 356 million and USD 357 million, respectively, due from officers. These loans generally consist of mortgages offered at variable and fixed interest rates.

As of 31 December 2010 and 2011, investments in real estate included USD 6 million and USD 6 million, respectively, of real estate held for sale.

Depreciation expense related to income producing properties was USD 40 million and USD 39 million for 2010 and 2011, respectively. Accumulated depreciation on investment real estate totalled USD 528 million and USD 558 million as of 31 December 2010 and 2011, respectively.

Substantially all mortgages, policy loans and other loan receivables are secured by buildings, land or the underlying policies.

### 3 Fair value disclosures

Fair value, as defined by the Fair Value Measurements and Disclosures Topic, is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Fair Value Measurements and Disclosures Topic requires all assets and liabilities that are measured at fair value to be categorised within the fair value hierarchy. This three-level hierarchy is based on the observability of the inputs used in the fair value measurement. The levels of the fair value hierarchy are defined as follows:

Level 1 inputs are quoted prices in active markets for identical assets or liabilities that the Group has the ability to access. Level 1 inputs are the most persuasive evidence of fair value and are to be used whenever possible.

Level 2 inputs are market-based inputs that are directly or indirectly observable but not considered level 1 quoted prices. Level 2 inputs consist of (i) quoted prices for similar assets or liabilities in active markets; (ii) quoted prices for identical assets or liabilities in non-active markets (eg markets which have few transactions and where prices are not current or price quotations vary substantially); (iii) inputs other than quoted prices that are observable (eg interest rates, yield curves, volatilities, prepayment speeds, credit risks and default rates); and (iv) inputs derived from, or corroborated by, observable market data.

Level 3 inputs are unobservable inputs. These inputs reflect the Group's own assumptions about market pricing using the best internal and external information available.

The types of instruments valued, based on quoted market prices in active markets, include most US government and sovereign obligations, active listed equities and most money market securities. Such instruments are generally classified within level 1 of the fair value hierarchy. The Group does not adjust the quoted price for such instruments, even in situations where it holds a large position and a sale could reasonably impact the quoted price.

The types of instruments that trade in markets that are not considered to be active, but are valued based on quoted market prices, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency include most government agency securities, investment-grade corporate bonds, certain mortgage- and asset-backed products, less liquid listed equities, and state, municipal and provincial obligations. Such instruments are generally classified within level 2 of the fair value hierarchy.

Exchange-traded derivative instruments typically fall within level 1 or level 2 of the fair value hierarchy depending on whether they are considered to be actively traded or not.

Certain financial instruments are classified within level 3 of the fair value hierarchy, because they trade infrequently and therefore have little or no price transparency. Such instruments include private equity, less liquid corporate debt securities and certain asset-backed securities. Certain over-the-counter derivatives trade in less liquid markets with limited pricing information, and the determination of fair value for these derivatives is inherently more difficult. Such instruments are classified within level 3 of the fair value hierarchy. Pursuant to the election of the fair value option, the Group classifies certain Life & Health policy reserves to level 3 of the fair value hierarchy. When appropriate, valuations are adjusted for various factors such as liquidity, bid/offer spreads, and credit considerations. Such adjustments are generally based on available market evidence. In the absence of such evidence, management's best estimate is used.

The fair values of assets are adjusted to incorporate the counterparty risk of non-performance. Similarly, the fair values of liabilities reflect the risk of non-performance of the Group, captured by the Group's credit spread. These valuation adjustments from assets and liabilities measured at fair value using significant unobservable inputs are recognised in net realised gains and losses. For the year ended 31 December 2011, these adjustments were non-material. Whenever the underlying assets or liabilities are reported in a specific business segment, the valuation adjustment is allocated accordingly. Valuation adjustments not attributable to any business segment are reported in Group items.

In certain situations, the Group uses inputs to measure the fair value of asset or liability positions that fall into different levels of the fair value hierarchy. In these situations, the Group will determine the level in which the fair value falls based upon the lowest level input that is significant to the determination of the fair value.

### Valuation techniques

US government securities typically have quoted market prices in active markets and are categorised as level 1 instruments in the fair value hierarchy. Non-US government holdings are generally classified as level 2 instruments and are valued on the basis of the quotes provided by pricing services, which are subject to the Group's pricing validation reviews and pricing vendor challenge process. Valuations provided by pricing vendors are generally based on the actual trade information as substantially all of the Group's non-US government holdings are traded in a transparent and liquid market.

Corporate debt securities mainly include US and European investment-grade positions, which are priced on the basis of quotes provided by third-party pricing vendors and first utilise valuation inputs from actively traded securities, such as bid prices, bid spreads to Treasury securities, Treasury curves, and same or comparable issuer curves and spreads. Issuer spreads are determined from actual quotes and traded prices and incorporate considerations of credit/default, sector composition, and liquidity and call features. Where market data is not available, valuations are developed based on the modelling techniques that utilise observable inputs and option-adjusted spreads and incorporate considerations of the security's seniority, maturity and the issuer's corporate structure.

Values of residential mortgage-backed securities (RMBS), commercial mortgage-backed securities (CMBS) and other asset-backed securities (Other ABS) are obtained both from third-party pricing vendors and through quoted prices, some of which may be based on the prices of comparable securities with similar structural and collateral features. Values of certain ABS for which there are no significant observable inputs are developed using benchmarks to similar transactions or indices. For both RMBS and CMBS, cash flows are derived based on the transaction-specific information which incorporates priority in the capital structure and are generally adjusted to reflect benchmark yields, market prepayment data, collateral performance (default rates and loss severity) for specific vintage and geography, credit enhancements, and ratings. For certain RMBS and CMBS with low levels of market liquidity, judgments may be required to determine comparable securities based on the loan type and deal-specific performance. CMBS terms may also incorporate lock-out periods that restrict borrowers from prepaying the loans or provide disincentives to prepay and therefore reduce prepayment risk of these securities, as compared to RMBS. The factors specifically considered in valuation of CMBS include borrower-specific statistics in a specific region, such as debt service coverage and loan-to-value ratios, as well as the type of commercial property.

The category "Other ABS" primarily includes debt securitised by credit card, student loan and auto loan receivables. Pricing inputs for these securities also focus on capturing, where relevant, collateral quality and performance, payment patterns, and delinquencies.

The Group uses third-party pricing vendor data to value agency securitised products, which mainly include collateralised mortgage obligations (CMO) and MBS government agency securities. The valuations generally utilise observable inputs consistent with those noted above for RMBS and CMBS.

Equity securities held by the Group for proprietary investment purposes are mainly classified in levels 1 and 2. Securities classified in level 1 are traded on public stock exchanges for which quoted prices are readily available. Level 2 equities include equity investments fair valued pursuant to the fair value option election and certain hedge fund positions; all valued based on primarily observable inputs.

The category "Other assets" mainly includes the Group's private equity and hedge fund investments, which are made directly or via ownership of funds. Substantially all these investments are classified as level 3 due to the lack of observable prices and significant judgment required in valuation. Valuation of direct private equity investments requires significant management judgment due to the absence of quoted market prices and the lack of liquidity. Initial valuation is based on the acquisition cost, and is further refined based on the available market information for the public companies that are considered comparable to the Group's holdings in the private companies being valued, and the private company-specific performance indicators, both historic and projected. Subsequent valuations also reflect business or asset appraisals, as well as market transaction data for private and public benchmark companies and the actual companies being valued, such as financing rounds and mergers and acquisitions activity. The Group's holdings in the private equity and hedge funds are generally valued utilising net asset values (NAV), subject to adjustments, as deemed necessary, for restrictions on redemption (lock-up periods and amount limitations on redemptions).

The Group holds both exchange-traded and over-the-counter (OTC) interest rate, foreign exchange, credit and equity derivative contracts for hedging and trading purposes. The fair values of exchange-traded derivatives measured using observable exchange prices are classified in level 1. Long-dated contracts may require adjustments to the exchange-traded prices which would trigger reclassification to level 2 in the fair value hierarchy. OTC derivatives are generally valued by the Group based on the internal models, which are consistent with industry standards and practices, and use both observable (dealer, broker or market consensus prices, spot and forward rates, interest rate and credit curves and volatility indices) and unobservable inputs (adjustments for liquidity, inputs derived from the observable data based on the Group's judgments and assumptions).

The Group's OTC interest rate derivatives primarily include interest rate swaps, futures, options, caps and floors, and are valued based on the cash flow discounting models which generally utilise as inputs observable market yield curves and volatility assumptions.

The Group's OTC foreign exchange derivatives primarily include forward, spot and option contracts and are generally valued based on the cash flow discounting models utilising as main inputs observable foreign exchange forward curves.

The Group's investments in equity derivatives primarily include OTC equity option contracts on single or baskets of market indices and equity options on individual or baskets of equity securities, which are valued using internally developed models (such as Black-Scholes option pricing model, various simulation models) calibrated with the inputs, which include underlying spot prices, dividend curves, volatility surfaces, yield curves, and correlations between underlying assets.

The Group's OTC credit derivatives include index and single name credit default swaps, as well as more complex structured credit derivatives. Plain vanilla credit derivatives, such as index and single-name credit default swaps, are valued by the Group based on the models consistent with the industry valuation standards for these credit contracts, and primarily utilising observable inputs published by market data sources, such as credit spreads and recovery rates. These valuation techniques warrant classification of plain vanilla OTC derivatives as level 2 financial instruments in the fair value hierarchy.

The Group also holds complex structured credit contracts, such as collateralised debt securities (CDS) referencing MBS, certain types of collateralised debt obligation (CDO) transactions, and the products sensitive to correlation between two or more underlying parameters (CDO-squared), all of which are classified within level 3 of the fair value hierarchy. A CDO is a debt instrument collateralised by various debt obligations, including bonds, loans and CDS of differing credit profiles. In a CDO-squared transaction, both the primary instrument and the underlying instruments are represented by CDOs. Generally, for CDO and CDO-squared transactions, the observable inputs such as CDS spreads and recovery rates are modified to adjust for correlation between the underlying debt instruments. The correlation levels are modelled at the portfolio level and calibrated at a transaction level to liquid benchmark rates.

**Assets and liabilities measured at fair value on a recurring basis**

As of 31 December 2010 and 2011, the fair values of assets and liabilities measured on a recurring basis by level of input were as follows:

As of 31 December 2010 USD millions	Quoted prices in active markets for identical assets and liabilities (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Impact of netting <sup>1</sup>	Total

### Gains and losses on assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (level 3)

The gains and losses relating to the assets and liabilities measured at fair value using significant unobservable inputs (level 3) were as follows:

USD millions	2010	2011
Gains/losses included in net income for the period	-36	-680
Whereof change in unrealised gains/losses relating to assets and liabilities still held at the reporting date	-825	-1 286

### Other assets measured at net asset value

Other assets measured at net asset value as of 31 December 2010 and 2011 were as follows:

USD millions	2010 Fair value	2011 Fair value	Unfunded commitments	Redemption frequency (if currently eligible)	Redemption notice period
Private equity funds	646	679	351	non-redeemable	na
Hedge funds	332	1 030		redeemable <sup>1</sup>	90 – 180 days <sup>2</sup>
Private equity direct	232	171		non-redeemable	na
Real estate funds	168	172	66	non-redeemable <sup>3</sup>	na
<b>Total</b>	<b>1 378</b>	<b>2 052</b>	<b>417</b>		

<sup>1</sup> The redemption frequency varies from monthly to up to three years.

<sup>2</sup> Cash distribution can be delayed for up to three years depending on the sale of the underlyings.

<sup>3</sup> One exception is a real estate fund that can be redeemed annually based on a 90-day notice period. This fund was fully redeemed in the second quarter of 2011.

The hedge fund investments employ a variety of strategies including global macro, relative value, and event-driven strategies across various asset classes including long/short equity and credit investments.

The private equity direct portfolio consists of equity and equity-like investments directly in other companies. These investments have no contractual term and are generally held based on financial or strategic intent.

Private equity and real estate funds generally have limitations imposed on the amount of redemptions from the fund during the redemption period due to illiquidity of the underlying investments. Fees may apply for redemptions or transferring of interest to other parties. Distributions are expected to be received from these funds as the underlying assets are liquidated over the life of the fund, which is generally from ten to twelve years.

The redemption frequency of hedge funds varies depending upon the manager as well as the nature of the underlying product. Additionally, certain funds may impose lock-up periods and redemption gates as defined in the terms of the individual investment agreement.

### Fair value option

The fair value option under the Financial Instruments Topic permits the choice to measure specified financial assets and liabilities at fair value on an instrument-by-instrument basis.

The Group elected the fair value option for positions in the following line items in the balance sheet:

### Fixed income securities trading

The Group elected the fair value option for the specific investments acquired within a transaction. These securities are classified as debt securities under the Group's accounting policies. Upon election of the fair value option the securities were classified as trading, with changes in fair value recorded in earnings. The primary reason for electing the fair value option is to mitigate volatility in earnings as a result of using different measurement attributes. In the second quarter of 2010, these fixed income securities matured.

**Equity securities trading**

The Group elected the fair value option for an investment previously classified as available-for-sale within other invested assets in the balance sheet. The Group economically hedges the investment with derivative instruments that offset this exposure. The changes in fair value of the derivatives are recorded in earnings. Electing the fair value option eliminates the mismatch previously caused by the economic hedging of the investment and reduces the volatility in the income statement.

**Liabilities for life and health policy benefits**

The Group elected the fair value option for existing guaranteed minimum death benefit (GMDB) reserves related to certain variable annuity contracts which are classified as universal life-type contracts. The Group has applied the fair value option as the equity risk associated with those contracts is managed on a fair value basis, and it is economically hedged with derivative options in the market.

**Assets and liabilities measured at fair value pursuant to election of the fair value option**

Pursuant to the election of the fair value option for the items described, the balances as of 31 December 2010 and 2011 were as follows:

USD millions	2010	2011
<b>Assets</b>		
Fixed income securities trading	11 252	7 548
of which at fair value pursuant to the fair value option	0 <sup>1</sup>	0
Equity securities trading	19 513	16 753
of which at fair value pursuant to the fair value option	475	455
<b>Liabilities</b>		
Liabilities for life and health policy benefits	-39 551	-39 044
of which at fair value pursuant to the fair value option	-271	-341

<sup>1</sup> These fixed income securities matured in the second quarter of 2010. Related changes in fair values are presented in the table below.

**Changes in fair values for items measured at fair value pursuant to election of the fair value option**

Gains/losses included in earnings for items measured at fair value pursuant to election of the fair value option including foreign exchange impact were as follows:

USD millions	2010	2011
Fixed income securities trading	-23	0
Equity securities trading	-17	-20
Liabilities for life and health policy benefits	22	-71
<b>Total</b>	-18	-91

Fair value changes, interest and dividends from fixed income securities trading and equity securities trading are reported in net realised investment gains/losses. Fair value changes from liabilities for life and health policy benefits are shown in life and health benefits.

#### 4 Derivative financial instruments

The Group uses a variety of derivative financial instruments including swaps, options, forwards, credit derivatives and exchange-traded financial futures in its trading and hedging strategies, in line with the Group's overall risk management strategy. The objectives include managing exposure to price, foreign currency and/or interest rate risk on planned or anticipated investment purchases, existing assets or liabilities, as well as locking in attractive investment conditions for future available funds.

The fair values represent the gross carrying value amounts at the reporting date for each class of derivative contract held or issued by the Group. The gross fair values are not an indication of credit risk, as many over-the-counter transactions are contracted and documented under ISDA master agreements or their equivalent. Management believes that such agreements provide for legally enforceable setoff in the event of default, which substantially reduces credit exposure.

**Fair values and notional amounts of derivative financial instruments**

As of 31 December 2010 and 2011, the fair values and notional amounts of the derivatives outstanding were as follows:

As of 31 December 2010 USD millions	Notional amount assets/liabilities	Fair value assets	Fair value liabilities	Carrying value assets/liabilities
<b>Derivatives not designated as hedging instruments</b>				
Interest rate contracts	452 349	4 646	-4 796	-150
Foreign exchange contracts	41 372	1 270	-1 201	69
Equity contracts	13 450	1 312	-710	602
Credit contracts	53 087	1 583	-1 324	259
Other contracts	28 949	423	-2 702	-2 279
<b>Total</b>	<b>589 207</b>	<b>9 234</b>	<b>-10 733</b>	<b>-1 499</b>
<b>Derivatives designated as hedging instruments</b>				
Interest rate contracts	4 582	582	-10	572
Foreign exchange contracts	3 012	30	-15	15
<b>Total</b>	<b>7 594</b>	<b>612</b>	<b>-25</b>	<b>587</b>
<b>Total derivative financial instruments</b>	<b>596 801</b>	<b>9 846</b>	<b>-10 758</b>	<b>-912</b>
<b>Amount offset</b>				
Where a right of setoff exists		-5 437	5 437	
Due to cash collateral		-1 123	335	
<b>Total net amount of derivative financial instruments</b>		<b>3 286</b>	<b>-4 986</b>	<b>-1 700</b>

As of 31 December 2011 USD millions	Notional amount assets/liabilities	Fair value assets	Fair value liabilities	Carrying value assets/liabilities
<b>Derivatives not designated as hedging instruments</b>				
Interest rate contracts	148 670	4 774	-4 638	136
Foreign exchange contracts	28 714	981	-766	215
Equity contracts	9 338	1 440	-436	1 004
Credit contracts	45 241	1 377	-1 313	64
Other contracts	23 802	237	-3 581	-3 344
<b>Total</b>	<b>255 765</b>	<b>8 809</b>	<b>-10 734</b>	<b>-1 925</b>
<b>Derivatives designated as hedging instruments</b>				
Interest rate contracts	2 914	879	-4	875
Foreign exchange contracts	2 077		-68	-68
<b>Total</b>	<b>4 991</b>	<b>879</b>	<b>-72</b>	<b>807</b>
<b>Total derivative financial instruments</b>	<b>260 756</b>	<b>9 688</b>	<b>-10 806</b>	<b>-1 118</b>
<b>Amount offset</b>				
Where a right of setoff exists		-5 756	5 756	
Due to cash collateral		-1 496	194	
<b>Total net amount of derivative financial instruments</b>		<b>2 436</b>	<b>-4 856</b>	<b>-2 420</b>

The notional amounts of derivative financial instruments give an indication of the Group's volume of derivative activity. The fair value assets are included in other invested assets and the fair value liabilities are included in accrued expenses and other liabilities. The fair value amounts that were not offset were nil as of 31 December 2010 and 2011, respectively.

### Non-hedging activities

The Group primarily uses derivative financial instruments for risk management and trading strategies. Gains and losses of derivative financial instruments not designated as hedging instruments are recorded in net realised investment gains/losses in the income statement. For the years ended 31 December 2010 and 2011, the gains and losses of derivative financial instruments not designated as hedging instruments were as follows:

USD millions	2010	2011
<b>Derivatives not designated as hedging instruments</b>		
Interest rate contracts	-64	1
Foreign exchange contracts	494	361
Equity contracts	-2	143
Credit contracts	-73	-219
Other contracts	-116	-808
<b>Total gain/loss recognised in income</b>	<b>239</b>	<b>-522</b>

### Hedging activities

The Group designates certain derivative financial instruments as hedging instruments. The designation of derivative financial instruments is primarily used for overall portfolio and risk management strategies. As of 31 December 2010 and 2011, the following hedging relationships were outstanding:

#### Fair value hedges

The Group enters into interest rate and foreign exchange swaps to reduce the exposure to interest rate and foreign exchange volatility for certain of its issued debt positions. These derivative instruments are designated as hedging instruments in qualifying fair value hedges. Gains and losses on derivative financial instruments designated as fair value hedging instruments are recorded in net realised investment gains/losses in the income statement. For the years ended 31 December 2010 and 2011, the gains and losses attributable to the hedged risks were as follows:

USD millions	2010		2011	
	Gains/losses on derivatives	Gains/losses on hedged items	Gains/losses on derivatives	Gains/losses on hedged items
<b>Fair value hedging relationships</b>				
Interest rate contracts	183	-147	406	-398
Foreign exchange contracts	-57	116	-69	74
<b>Total gain/loss recognised in income</b>	<b>126</b>	<b>-31</b>	<b>337</b>	<b>-324</b>

#### Hedges of the net investment in foreign operations

The Group designates non-derivative monetary financial instruments as hedging the foreign currency exposure of its net investment in certain foreign operations.

For the years ended 31 December 2010 and 2011, the Group recorded an accumulated net unrealised foreign currency remeasurement gain of USD 171 million and a gain of USD 397 million, respectively, in shareholders' equity. These offset translation gains and losses on the hedged net investment.

**Maximum potential loss**

In consideration of the rights of setoff and the qualifying master netting arrangements with various counterparties, the maximum potential loss as of 31 December 2010 and 2011 was approximately USD 4 409 million and USD 3 932 million, respectively. The maximum potential loss is based on the positive market replacement cost assuming non-performance of all counterparties, net of cash collateral.

**Credit risk-related contingent features**

Certain derivative instruments held by the Group contain provisions that require its debt to maintain an investment-grade credit rating. If the Group's credit rating were downgraded or no longer rated, the counterparties could request immediate payment, guarantee or an ongoing full overnight collateralisation on derivative instruments in net liability positions.

The total fair value of derivative financial instruments containing credit risk-related contingent features amounted to USD 1 975 million and USD 1 538 million as of 31 December 2010 and 2011, respectively. For derivative financial instruments containing credit risk-related contingent features, the Group posted collateral of USD 335 million and USD 194 million as of 31 December 2010 and 2011, respectively. In the event of a reduction of the Group's credit rating to below investment grade, a fair value of USD 1 344 million additional collateral would have had to be posted as of 31 December 2011. The total equals the amount needed to settle the instruments immediately as of 31 December 2010 and 2011, respectively.

**Credit derivatives written/sold**

The Group writes/sells credit derivatives, including credit default swaps, credit spread options and credit index products, and total return swaps. The total return swaps, for which the Group assumes asset risk mainly of variable interest entities, qualify as guarantees under FASB ASC Topic 460. These activities are part of the Group's overall portfolio and risk management strategies. The events that could require the Group to perform include bankruptcy, default, obligation acceleration or moratorium of the credit derivative's underlying.

The following tables show the fair values and the maximum potential payout of the credit derivatives written/sold as of 31 December 2010 and 2011, categorised by the type of credit derivative and credit spreads, which were based on external market data. The fair values represent the gross carrying values, excluding the effects of netting under ISDA master agreements and cash collateral netting. The maximum potential payout is based on the notional values of the derivatives and represents the gross undiscounted future payments the Group would be required to make, assuming the default of all credit derivatives' underlyings.

The fair values of the credit derivatives written/sold do not represent the Group's effective net exposure as the ISDA master agreement and the cash collateral netting are excluded.

The Group has purchased protection to manage the performance/payment risks related to credit derivatives. As of 31 December 2010 and 2011, the total purchased credit protection based on notional values was USD 30 304 million and USD 26 367 million, respectively. Thereof USD 12 025 million and USD 8 159 million, respectively, were related to identical underlyings for which the Group sold credit protection. For tranching indexes and baskets, only matching tranches of the respective index were determined as identical. In addition to the purchased credit protection, the Group manages the performance/payment risks through a correlation hedge, which is established with non-identical offsetting positions.

The maximum potential payout is based on notional values of the credit derivatives. The Group enters into total return swaps mainly with variable interest entities which issue insurance-linked and credit-linked securities.

As of 31 December 2010 and 2011, the fair values and maximum potential payout of the written credit derivatives outstanding were as follows:

As of 31 December 2010 USD millions	Total fair values of credit derivatives written/sold	Maximum potential payout (time to maturity)			Total maximum potential payout

## 5 Deferred acquisition costs (DAC) and acquired present value of future profits (PVFP)

For the years ended 31 December, the DAC and PVFP were as follows:

2010 USD millions	DAC			PVFP
	Non-Life	Life&Health	Total	
Opening balance as of 1 January 2010	869	3 025	3 894	6 054
Deferred	1 734	313	2 047	
Effect of acquisitions/disposals and retrocessions		-212	-212	-1 154
Amortisation	-1 805	-365	-2 170	-449
Interest accrued on unamortised PVFP				247
Effect of foreign currency translation	-6	18	12	-75
Effect of change in unrealised gains/losses				-58
<b>Closing balance as of 31 December 2010</b>	<b>792</b>	<b>2 779</b>	<b>3 571</b>	<b>4 565</b>

2011 USD millions	DAC			PVFP
	Non-Life	Life&Health	Total	
Opening balance as of 1 January 2011	792	2 779	3 571	4 565
Deferred	2 432	254	2 686	
Effect of acquisitions/disposals and retrocessions	-10		-10	247
Amortisation	-1 985	-314	-2 299	-631
Interest accrued on unamortised PVFP				231
Effect of foreign currency translation	-2	-23	-25	-20
Effect of change in unrealised gains/losses				-166
<b>Closing balance as of 31 December 2011</b>	<b>1 227</b>	<b>2 696</b>	<b>3 923</b>	<b>4 226</b>

Retroceded DAC and PVFP may arise on retrocession of reinsurance portfolios, including reinsurance undertaken as part of a securitisation. The associated potential retrocession recoveries are determined by the nature of the retrocession agreements and by the terms of the securitisation.

The percentage of PVFP which is expected to be amortised in each of the next five years is 8%, 8%, 7%, 7% and 7%.

## 6 Debt

The Group enters into long- and short-term debt arrangements to obtain funds for general corporate use and specific transaction financing. The Group defines short-term debt as debt having a maturity at the balance sheet date of less than one year and long-term debt as having a maturity of greater than one year. Interest expense is classified accordingly.

The Group's debt as of 31 December was as follows:

USD millions	2010	2011
Senior financial debt	33	279
Senior financial debt – convertible perpetual capital instrument	3 966	
Senior operational debt	5 018	3 848
Subordinated financial debt	1 781	
<b>Short-term debt – financial and operational debt</b>	<b>10 798</b>	<b>4 127</b>
Senior financial debt	2 590	2 976
Senior operational debt	6 976	4 854
Subordinated financial debt	3 634	3 587
Subordinated operational debt	5 227	5 124
<b>Long-term debt – financial and operational debt</b>	<b>18 427</b>	<b>16 541</b>
<b>Total carrying value</b>	<b>29 225</b>	<b>20 668</b>
<b>Total fair value</b>	<b>28 017</b>	<b>20 022</b>

The Group uses debt for general corporate purposes and to fund discrete pools of operational leverage and financial intermediation assets. Operational leverage and financial intermediation are subject to asset and liability matching resulting in little to no risk that the assets will be insufficient to service and settle the liabilities. Debt used for operational leverage and financial intermediation is treated as operational debt and excluded by the rating agencies from financial leverage calculations. Certain debt positions are limited recourse, meaning the debtors' claims are limited to assets underlying the financing. As of 31 December 2010 and 2011, debt related to operational leverage and financial intermediation amounted to USD 17.2 billion (thereof USD 7.5 billion limited recourse) and USD 13.8 billion (thereof USD 6.3 billion limited recourse), respectively.

### Maturity of long-term debt

As of 31 December, long-term debt as reported above had the following maturities:

USD millions	2010	2011
Due in 2012	2 310	0 <sup>1</sup>
Due in 2013	1 621	1 605
Due in 2014	1 773	1 735
Due in 2015	697	691
Due in 2016	2 456	2 304
Due after 2016	9 570	10 206
<b>Total carrying value</b>	<b>18 427</b>	<b>16 541</b>

<sup>1</sup> Balance was reclassified to short-term debt.

**Senior long-term debt**

**Interest expense on long-term debt**

Interest expense on long-term debt for the periods ended 31 December was as follows:

USD millions	2010	2011
Senior financial debt	75	80
Senior operational debt	349	282
Subordinated financial debt	266	230
Subordinated operational debt	248	256
<b>Total</b>	<b>938</b>	<b>848</b>

**Long-term debt issued in 2011**

In December 2011, the Group issued CHF 600 million under the EMTN programme, due in 2017 with a coupon of 2.125%.

## 7 Unpaid claims and claim adjustment expenses

The liability for unpaid claims and claim adjustment expenses is analysed as follows:

USD millions	2010	2011
Non-Life	53 345	53 827
Life & Health	11 345	11 051
<b>Total</b>	<b>64 690</b>	<b>64 878</b>

A reconciliation of the opening and closing reserve balances for non-life unpaid claims and claim adjustment expenses for the period is presented as follows:

USD millions	2010	2011
Balance as of 1 January	57 015	53 345
Reinsurance recoverable	-6 307	-5 717
Deferred expense on retroactive reinsurance	-455	-401

<b>Total paid</b>	<b>-9 703</b>	<b>-9 593</b>
Foreign exchange	-562	-441
Effect of acquisitions, disposals, new retroactive reinsurance and other items	158	1 044
Net	47 227	46 897
Reinsurance recoverable	5 717	6 610
Deferred expense on retroactive reinsurance	401	320
<b>Balance as of 31 December</b>	<b>53 345</b>	<b>53 827</b>

The Group does not discount liabilities arising from prospective property and casualty insurance and reinsurance contracts, including liabilities which are discounted for US statutory reporting purposes. Liabilities arising from property and casualty insurance and reinsurance contracts acquired in a business combination are initially recognised at fair value in accordance with the purchase method of accounting.

**Asbestos and environmental claims exposure**

The Group's obligation for claims payments and claims settlement charges also includes obligations for long-latent injury claims arising out of policies written prior to 1985, in particular in the area of US asbestos and environmental liability.

Due to the inherent uncertainties and assumptions on which these estimates are based, however, the Group cannot exclude the need to make further additions to these provisions in the future.

At the end of 2011, the Group carried net reserves for US asbestos, environmental and other long-latent health hazards equal to USD 2 214 million. During 2011, the Group incurred net losses of USD 128 million and paid net against these liabilities USD 183 million.

The Group maintains an active commutation strategy to reduce exposure. When commutation payments are made, the traditional "survival ratio" is artificially reduced by premature payments which should not imply a reduction in reserve adequacy.

**Prior-year development**

Claims development on prior years were driven by favourable experience in property, liability, credit and other specialty lines. Some reserve strengthening was absorbed in the overall number, on US Workers' Compensation business, UK Motor business and an increase for US asbestos and environmental losses. The adverse development cover with Berkshire Hathaway, which covers losses from 2008 or earlier, remains in place but had no impact on the result for 2011, as it was already recognised at the minimum commutation value at year-end 2010 and remains recognised at that value.

## 8 Reinsurance information

For the years ended 31 December

### Premiums written, premiums earned and fees assessed against policyholders

USD millions	Non-Life	Life&Health	2010 Total	Non-Life	Life&Health	2011 Total

**Reinsurance assets and liabilities**

The reinsurance assets and liabilities as of 31 December were as follows:

USD millions	Non-Life	Life&Health	2010 Total	Non-Life	Life&Health	2011 Total
<b>Assets</b>						
Reinsurance recoverable	5 717	6 920	12 637	6 610	5 227	11 837
Deferred acquisition costs	793	2 778	3 571	1 227	2 696	3 923
<b>Liabilities</b>						
Unpaid claims and claim adjustment expenses	53 345	11 345	64 690	53 827	11 051	64 878
Life and health policy benefits		39 551	39 551		39 044	39 044
Policyholder account balances		36 478	36 478		34 162	34 162

**Reinsurance receivables**

Reinsurance receivables as of 31 December were as follows:

USD millions	2010	2011
Premium receivables invoiced	1 598	1 916
Receivables invoiced from ceded re/insurance business	695	512
Assets arising from the application of the deposit method of accounting and meeting the definition of financing receivables	568	707
Recognised allowance	-152	-132

**Sales inducements**

Sales inducements are offered to contract holders of certain universal life and annuity products. The amounts deferred equal the sum of persistency bonuses credited to the account value plus the non-interest related increase in the persistency bonus liability. These costs are amortised in constant proportion to estimated gross profits over the life of the contract, using the credited interest rates as the discount rate.

Sales inducements as of 31 December were as follows:

USD millions	2010	2011
Balance as of 1 January	1 035	1 019
Sales inducements deferred	234	265
Sales inducements amortised	-219	-257
Impact of foreign exchange and other movements	-31	-7
Unamortised balance of sales inducements	1 019	1 020

**Policyholder dividends**

Policyholder dividends are recognised as an element of policyholder benefits. The relative percentage of participating insurance of the life and health policy benefits was 7% in 2010 and 2011. The amount of policyholder dividend expense in 2010 and 2011 was USD 110 million and USD 134 million, respectively.

## 9 Earnings per share

All of the Group's companies prepare statutory financial statements based on local laws and regulations. Most jurisdictions require reinsurers to maintain a minimum amount of capital in excess of statutory definition of net assets or maintain certain minimum capital and surplus levels. In addition, some jurisdictions place certain restrictions on amounts that may be loaned or transferred to the parent company. The Group's ability to pay dividends may be restricted by these requirements.

Dividends are declared in Swiss francs. During the years ended 31 December 2010 and 2011, the Group's dividends declared per share were CHF 1.00 and CHF 2.75, respectively.

Earnings per share for the years ended 31 December were as follows:

USD millions (except share data)	2010	2011
<b>Basic earnings per share</b>		
Net income	2 134	<b>2 798</b>
Non-controlling interests	-154	<b>-172</b>
Interest on convertible perpetual capital instrument	-1 117	
Net income attributable to common shareholders	863	<b>2 626</b>
Weighted average common shares outstanding	342 524 717	<b>342 136 735</b>
<b>Net income per share in USD</b>	2.52	<b>7.68</b>
<b>Net income per share in CHF<sup>1</sup></b>	2.64	<b>6.79</b>
<b>Effect of dilutive securities</b>		
Change in income available to common shares due to convertible bonds	229	<b>12</b>
Change in average number of shares due to convertible bonds and employee options	106 778 101	<b>10 065 318</b>
<b>Diluted earnings per share</b>		
Net income assuming debt conversion and exercise of options	1 092	<b>2 638</b>
Weighted average common shares outstanding	449 302 818	<b>352 202 053</b>
<b>Net income per share in USD</b>	2.43	<b>7.49</b>
<b>Net income per share in CHF<sup>1</sup></b>	2.54	<b>6.63</b>

<sup>1</sup> The translation from USD to CHF is shown for informational purposes only and has been calculated at the Group's average exchange rates for the years ended 31 December 2010 and 2011, respectively.

## 10 Income taxes

The Group is generally subject to corporate income taxes based on the taxable net income in various jurisdictions in which the Group operates. The components of the income tax charge were:

USD millions	2010	2011
Current taxes	696	106
Deferred taxes	-155	-29
<b>Income tax expense</b>	<b>541</b>	<b>77</b>

### Tax rate reconciliation

The following table reconciles the expected tax expense at the Swiss statutory tax rate to the actual tax expense in the accompanying income statement:

USD millions	2010	2011
Income tax at the Swiss statutory tax rate of 21.0%	562	604
Increase (decrease) in the income tax charge resulting from:		
Foreign income taxed at different rates	39	138
Impact of foreign exchange movements	65	-38
Disallowed expenses	2	7
Tax exempt income/dividends received deduction	-47	-45
Change in valuation allowance	68	-143
Basis differences in subsidiaries		-368
Change in statutory tax rates	14	-122
Change in liability for unrecognised tax benefits including interest and penalties	-50	99
Life tax adjustments	14	-9
Other, net	-126	-46
<b>Total</b>	<b>541</b>	<b>77</b>

For 2011, the Group reported a tax expense of USD 77 million. This represents an effective tax rate of 2.7%, compared to an effective tax rate of 20.2% in the prior year. The decrease in the tax rate was primarily due to a non-recurring benefit from the change in tax basis in a subsidiary based on a write-down in the value of a Group subsidiary required in 2011 local statutory statements, changes in local country tax rates and the release of valuation allowances.

**Deferred and other non-current taxes**

The components of deferred and other non-current taxes were as follows:

USD millions	2010	2011
<b>Deferred tax assets</b>		
Income accrued/deferred	606	599
Technical provisions	785	1 531
Unrealised losses on investments	63	10
Pension provisions	243	292
Benefit on loss carryforwards	4 222	4 046
Currency translation adjustments	483	481
Other	1 004	1 368
<b>Gross deferred tax asset</b>	<b>7 406</b>	<b>8 327</b>
Valuation allowance	-1 602	-1 418
<b>Total</b>	<b>5 804</b>	<b>6 909</b>
<b>Deferred tax liabilities</b>		
Present value of future profits	-1 059	-1 082
Income accrued/deferred	-591	-629
Bond amortisation	-184	-139
Deferred acquisition costs	-538	-687
Technical provisions	-1 642	-2 446
Unrealised gains on investments	-529	-1 932
Untaxed realised gains	-336	-373
Foreign exchange provisions	-416	-418
DFI losses	-99	-17
Other	-930	-783
<b>Total</b>	<b>-6 324</b>	<b>-8 506</b>
<b>Deferred income taxes</b>	<b>-520</b>	<b>-1 597</b>
<b>Liability for unrecognised tax benefits including interest and penalties</b>	<b>-1 196</b>	<b>-1 256</b>
<b>Deferred and other non-current taxes</b>	<b>-1 716</b>	<b>-2 853</b>

As of 31 December 2011, the aggregate amount of temporary differences associated with investment in subsidiaries, branches and associates and interests in joint ventures, for which deferred tax liabilities have not been recognised amount to approximately USD 3 857 million. In the remote scenario in which these temporary differences were to reverse simultaneously, the resulting tax liabilities would be very limited due to participation exemption rules.

As of 31 December 2011, the Group had USD 13 049 million net operating tax loss carryforwards, expiring as follows: USD 8 million in 2012, USD 218 million in 2015, USD 1 million in 2016, USD 7 169 million in 2017 and beyond and USD 5 653 million never expire. The Group also had capital loss carryforwards of USD 151 million, expiring as follows: USD 1 million in 2013, USD 45 million in 2014, and USD 105 million never expire. Net operating tax losses of USD 730 million were utilised or expired during the period ended 31 December 2011.

Income taxes paid in 2011 and 2010 were USD 749 million and USD 476 million, respectively.

**Unrecognised tax benefits**

A reconciliation of the opening and closing amount of gross unrecognised tax benefits (excluding interest and penalties) is as follows:

USD millions	2010	2011
Balance as of 1 January	1 138	980
Additions based on tax positions of current year	69	373
Additions for tax positions of prior years	-126	9
Reductions for tax positions of prior years	46	-219
Settlements	-147	-1
Lapse of statute of limitations		-95
<b>Balance as of 31 December</b>	<b>980</b>	<b>1 047</b>

The amount of gross unrecognised tax benefits within the tabular reconciliation that, if recognised, would affect the effective tax rate were approximately USD 630 million and USD 726 million at 31 December 2010 and 2011, respectively.

Interest and penalties related to unrecognised tax benefits are recorded in income tax expense. Such benefit for the period ending 31 December 2011 was USD 6 million (USD 21 million for the period ending 31 December 2010). As of 31 December 2010 and 2011, USD 216 million and USD 209 million, respectively, were accrued for the payment of interest (net of tax benefits) and penalties. The accrued interest balance as of 31 December 2011 is included within the deferred and other non-current taxes section reflected above and in the statement of financial position.

The balance of gross unrecognised tax benefits as of 31 December 2011 presented in the table above is less than the liability for unrecognised tax benefits reflected in the deferred and other non-current taxes section due to the removal of interest expense (USD 209 million).

During the year, certain tax positions and audits in Switzerland, the UK and the US were effectively settled.

The Group continually evaluates proposed adjustments by taxing authorities. The Group believes that it is reasonably possible (more than remote and less than likely) that the balance of unrecognised tax benefits could increase or decrease over the next 12 months due to settlements or expiration of statutes. However, quantification of an estimated range cannot be made at this time.

The following table summarises jurisdictions and tax years that remain subject to examination:

Australia	2004–2011	Korea	2008–2011
Brazil	2007–2011	Malaysia	2005–2011
Canada	2006–2011	Mexico	2007–2011
China	2003–2011	Netherlands	2009–2011

India	2005–2011	Spain	2007–2011
Ireland	2010–2011	Switzerland	2007–2011
Israel	2008–2011	United Kingdom	2003, 2004, 2008–2011
Italy	2007–2011	United States	2009–2011
Japan	2008–2011		

## 11 Benefit plans

### Defined benefit pension plans and post-retirement benefits

The Group sponsors various funded defined benefit pension plans. Employer contributions to the plans are charged to income on a basis which recognises the costs of pensions over the expected service lives of employees covered by the plans. The Group's funding policy for these plans is to contribute annually at a rate that is intended to maintain a level percentage of compensation for the employees covered. A full valuation is prepared at least every three years.

The Group also provides certain healthcare and life insurance benefits for retired employees and their dependants. Employees become eligible for these benefits when they become eligible for pension benefits.

The measurement date of these plans is 31 December for each year presented.

2010 USD millions	Swiss plan	Foreign plans	Other benefits	Total
Benefit obligation as of 1 January	2 688	1 915	305	4 908
Service cost	82	12	6	100
Interest cost	84	101	13	198

<b>Total</b>	<b>950</b>	<b>271</b>	<b>-211</b>	<b>1 010</b>

### Components of net periodic benefit cost

The components of pension and post-retirement cost for the years ended 31 December 2010 and 2011, respectively, were as follows:

2010				
USD millions	Swiss plan	Foreign plans	Other benefits	Total
Service cost (net of participant contributions)	82	12	6	100
Interest cost	84	101	13	198
Expected return on assets	-126	-106		-232
Amortisation of:				
Net gain/loss	10	16	-11	15
Prior service cost	6		-11	-5
Effect of settlement, curtailment and termination	3	-1	-1	1
<b>Net periodic benefit cost</b>	<b>59</b>	<b>22</b>	<b>-4</b>	<b>77</b>

2011				
USD millions	Swiss plan	Foreign plans	Other benefits	Total
Service cost (net of participant contributions)	113	10	5	128
Interest cost	91	102	13	206
Expected return on assets	-128	-106		-234
Amortisation of:				
Net gain/loss	37	17	-11	43
Prior service cost	6		-11	-5
Effect of settlement, curtailment and termination	1		-2	-1
<b>Net periodic benefit cost</b>	<b>120</b>	<b>23</b>	<b>-6</b>	<b>137</b>

Other changes in plan assets and benefit obligations recognised in other comprehensive income were as follows:

2010 USD millions	Swiss plan	Foreign plans	Other benefits	Total
Net gain/loss	155	-61	11	105
Prior service cost/credit			-7	-7
Amortisation of:				
Net gain/loss	-10	-19	11	-18
Prior service cost	-6		11	5
Exchange rate gain/loss recognised during the year		-8		-8
<b>Total recognised in other comprehensive income, gross of tax</b>	<b>139</b>	<b>-88</b>	<b>26</b>	<b>77</b>
<b>Total recognised in net periodic benefit cost and other comprehensive income, gross of tax</b>	<b>198</b>	<b>-66</b>	<b>22</b>	<b>154</b>

2011 USD millions	Swiss plan	Foreign plans	Other benefits	Total
Net gain/loss	317	64	32	413
Prior service cost/credit	-39			-39
Amortisation of:				
Net gain/loss	-37	-17	11	-43
Prior service cost	-6		11	5
Exchange rate gain/loss recognised during the year		-1		-1
<b>Total recognised in other comprehensive income, gross of tax</b>	<b>235</b>	<b>46</b>	<b>54</b>	<b>335</b>
<b>Total recognised in net periodic benefit cost and other comprehensive income, gross of tax</b>	<b>355</b>	<b>69</b>	<b>48</b>	<b>472</b>

The estimated net loss and prior service cost for the defined benefit pension plans that will be amortised from accumulated other comprehensive income into net periodic benefit cost in 2012 are USD 54 million and USD nil million, respectively. The estimated net gain and prior service credit for the other defined post-retirement benefits that will be amortised from accumulated other comprehensive income into net periodic benefit cost in 2012 was USD 7 million and USD 11 million, respectively.

The accumulated benefit obligation (the current value of accrued benefits excluding future salary increases) for pension benefits was USD 5 035 million and USD 5 185 million as of 31 December 2010 and 2011, respectively.

Pension plans with an accumulated benefit obligation in excess of plan assets were as follows:

USD millions	2010	2011
Projected benefit obligation	4 607	4 275
Accumulated benefit obligation	4 562	4 235
Fair value of plan assets	4 290	3 717

**Principal actuarial assumptions**

	Swiss plan		Foreign plans weighted average		Other benefits weighted average	
	2010	2011	2010	2011	2010	2011
<b>Assumptions used to determine obligations at the end of the year</b>						
Discount rate	2.8%	2.4%	5.4%	4.9%	4.0%	3.5%
Rate of compensation increase	2.3%	2.3%	2.5%	2.2%	4.1%	3.9%
<b>Assumptions used to determine net periodic pension costs for the year ended</b>						
Discount rate	3.3%	2.8%	5.6%	5.4%	4.5%	4.0%
Expected long-term return on plan assets	4.5%	4.0%	6.4%	6.0%		
Rate of compensation increase	2.3%	2.3%	3.5%	2.5%	4.1%	4.1%
<b>Assumed medical trend rates at year end</b>						
Medical trend – initial rate					6.5%	6.3%
Medical trend – ultimate rate					4.7%	4.7%
Year that the rate reaches the ultimate trend rate					2015	2015

The expected long-term rates of return on plan assets are based on long-term expected inflation, interest rates, risk premiums and targeted asset category allocations. The estimates take into consideration historical asset category returns.

Assumed healthcare cost trend rates have a significant effect on the amounts reported for the healthcare plans. A one percentage point change in assumed healthcare cost trend rates would have had the following effects for 2011:

USD millions	1 percentage point increase	1 percentage point decrease
Effect on total of service and interest cost components	1	-1
Effect on post-retirement benefit obligation	29	-24

**Plan asset allocation by asset category**

The actual asset allocation by major asset category for defined benefit pension plans as of the respective measurement dates in 2010 and 2011 was as follows:

Asset category	Swiss plan allocation			Foreign plans allocation		
	2010	2011	Target allocation	2010	2011	Target allocation

Real estate	18%	20%	21%	2%	2%	2%
Other	11%	9%	6%	4%	8%	4%
<b>Total</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>

Actual asset allocation is determined by a variety of current economic and market conditions and considers specific asset class risks.

Equity securities include Swiss Re common stock of USD 4 million (0.1% of total plan assets) and USD 3 million (0.1% of total plan assets) as of 31 December 2010 and 2011, respectively.

The Group's pension plan investment strategy is to match the maturity profiles of the assets and liabilities in order to reduce the future volatility of pension expense and funding status of the plans. This involves balancing investment portfolios between equity and fixed income securities. Tactical allocation decisions that reflect this strategy are made on a quarterly basis.

**Assets measured at fair value**

For a description of the different fair value levels and valuation techniques see Note 3 Fair value disclosures.

Certain items reported as pension plan assets at fair value in the table below are not within the scope of Note 3, namely two positions: real estate and an insurance contract.

Real estate positions classified as level 1 and level 2 are exchange-traded real estate funds where a market valuation is readily available. Real estate reported on level 3 is property owned by the pension funds. These positions are accounted for at the capitalised income value. The capitalisation based on sustainable recoverable earnings is conducted at interest rates that are determined individually for each property, based on the property's location, age and condition. If properties are intended for disposal, the estimated selling costs and taxes are recognised in provisions. Sales gains or losses are allocated to income from real estate when the contract is concluded.

The fair value of the insurance contract is based on the fair value of the assets backing the contract.

Other assets classified within level 3 mainly consist of private equity investments valued with the same methodology as mentioned in Note 3.

For the years ended 31 December, the fair values of pension plan assets by level of input were as follows:

2010 USD millions	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total
<b>Assets</b>				
Fixed income securities:		2 204		2 204

Impact of foreign exchange movements	53	-2	51
<b>Closing balance as of 31 December</b>	<b>539</b>	<b>113</b>	<b>652</b>

2011 USD millions	Real estate	Other assets	Total
Balance as of 1 January	539	113	652
Realised/unrealised gains/losses:			
Relating to assets still held at the reporting date	6	-9	-3
Relating to assets sold during the period		1	1
Purchases, issuances and settlements	7	16	23
Transfers in and/or out of Level 3			0
Impact of foreign exchange movements	-3	-2	-5
<b>Closing balance as of 31 December</b>	<b>549</b>	<b>119</b>	<b>668</b>

**Expected contributions and estimated future benefit payments**

The employer contributions expected to be made in 2012 to the defined benefit pension plans are USD 150 million and to the post-retirement benefit plan are USD 16 million.

As of 31 December 2011, the projected benefit payments, which reflect expected future service, not adjusted for transfers in and for employees' voluntary contributions, are as follows:

USD millions	Swiss plan	Foreign plans	Other benefits	Total
2012	149	70	16	235
2013	148	72	17	237
2014	153	74	18	245
2015	152	77	18	247
2016	159	80	19	258
Years 2017-2021	818	450	108	1 376

**Defined contribution pension plans**

The Group sponsors a number of defined contribution plans to which employees and the Group make contributions. The accumulated balances are paid as a lump sum at the earlier of retirement, termination, disability or death. The amount expensed in 2010 and in 2011 was USD 39 million and USD 58 million, respectively.

## 12 Share-based payments

As of 31 December 2010 and 2011, the Group had the share-based compensation plans described below.

Total compensation cost for share-based compensation plans recognised in net income was USD 129 million and USD 52 million in 2010 and 2011, respectively. The related tax benefit was USD 34 million and USD 16 million, respectively.

### Stock option plans

Stock option plans include a fixed-option plan and an additional grant to certain members of executive management. No options were granted under these plans from 2007 onwards.

Under the fixed-option plan, the exercise price of each option is equal to the market price of the shares on the date of the grant. Options issued vest at the end of the fourth year and have a maximum life of ten years.

A summary of the activity of the Group's stock option plans is as follows:

2011	Weighted average exercise price in CHF	Number of shares
Outstanding as of 1 January	116	5 255 044
Options sold	73	-51 350
Options forfeited or expired	186	-990 960
Reclassification to liabilities	88	-1 849 000
<b>Outstanding as of 31 December</b>	<b>109</b>	<b>2 363 734</b>
<b>Exercisable as of 31 December</b>	<b>109</b>	<b>2 363 734</b>

The following table summarises the status of stock options outstanding as of 31 December 2011:

Range of exercise prices in CHF	Number of options	Weighted average remaining contractual life in years	Weighted average exercise price in CHF
67–100	1 152 252	2.3	72
144–166	1 211 482	1.0	145
<b>67–166</b>	<b>2 363 734</b>	<b>1.7</b>	<b>109</b>

All stock options outstanding are also exercisable and the status of these exercisable options is reflected in the table above.

The fair value of each option grant was estimated on the date of grant using a binomial option-pricing model.

### Restricted shares

The Group issued 3 727 and 14 834 restricted shares to selected employees in 2010 and 2011, respectively. Moreover, as an alternative to the Group's cash bonus programme, 234 560 and 425 154 shares were issued during 2010 and 2011, respectively.

A summary of the movements in shares relating to outstanding awards granted under the restricted share plans as of 31 December 2011 is as follows:

	Number of shares	Weighted average grant date fair value in CHF
Non-vested at 1 January	1 303 913	65
Granted	439 988	58
Delivery of restricted shares	-963 713	76
<b>Outstanding as of 31 December</b>	<b>780 188</b>	<b>48</b>

The weighted average fair value of restricted shares, which equals the market price of the shares on the date of the grant, was CHF 65 and CHF 48 in 2010 and 2011, respectively.

### Performance share plan

In 2009 and 2010, the Group granted a share plan for the Chairman and Vice Chairman of the Board of Directors. The Group did not grant a further plan in 2011. The plans have a requisite service period of three years and are settled in shares. The plans are measured based on Swiss Re's Total Shareholder Return (TSR), representing the share price performance plus paid dividend in any performance period, against a selected peer group. The final number of shares to be released upon vesting can vary between 0% and 150% of the original grant.

The fair value of the 2009 and 2010 plans were based on the share price as of the date of grant, which was CHF 36.00 and CHF 53.60, respectively. 111 111 and 83 957 units were issued under these plans in 2009 and 2010 respectively, and the same number of units remains outstanding as of 31 December 2011.

### Long-term Incentive plan

The Group annually grants a Long-term Incentive plan (LTI) to selected employees with a three-year vesting period. The requisite service period as well as the maximum contractual term for each plan is three years and the final payment, if any, occurs at the end of this performance measurement period. The plan includes a payout factor which is derived from return on equity (ROE) and earnings per share (EPS) targets over the vesting period. The payout ratio can vary between 0 and 2 and the final payment for each plan will depend on whether the performance targets have been achieved over the plan period. The fair value of the plans are based on stochastic models which consider the likelihood of achieving performance targets and the impact of dividends. Each of the plan grants that were outstanding during 2011 are described below.

The 2008 LTI grant was expected to be settled in cash. The payout factors are driven by average ROE and EPS compound annual growth over the vesting period. The LTI grant from 2008 vested in March 2011 and there was no payout as the plan performance targets were not achieved.

The LTI plan granted in 2009 is expected to be settled in shares. The payout factor is driven by average ROE and EPS compound annual growth over the vesting period. At grant, the plan was expected to be settled in cash; however, the Group subsequently changed its intention to settle in shares. As a result, the share price used for measurement was CHF 42.40 which was set as of the date the share settlement decision was made in November 2009.

The LTI plans granted in 2010 and 2011 are expected to be settled in shares. The payout factors are driven by average ROE and average EPS over the vesting period. The share price used for measurement is based on the date of grant and was CHF 48.15 and CHF 39.39 for the 2010 and 2011 plans, respectively.

**Value alignment incentive**

In 2009, the Group issued a compensation plan to selected employees. The plan has a requisite service period of three years and is expected to be settled in cash and shares. The settlement is based on a three-year risk free interest rate, the Swiss Re share price performance and dividend yield over the vesting period. The grant price was based on the closing share price as of 19 February 2009 of CHF 16.74. A total of 140 570 units were outstanding as of 1 January 2011 and after forfeitures during 2011, 131 361 units were outstanding as of 31 December 2011.

**Stock appreciation rights**

In 2006, the Group issued 3 million stock appreciation rights (SAR) as an extraordinary grant following the Insurance Solutions acquisition. The plan was expected to be settled in cash. The requisite service period was two years, while the maximum contractual term was five years. The plan vested in 2008; however, holders of the award were still able to exercise their rights until the maximum contractual period expired, in 2011. The fair value of the appreciation rights were estimated at date of grant using a binomial option-pricing model and was revised at every balance sheet date until exercise. The plan expired in 2011 with no value.

**Unrecognised compensation costs**

As of 31 December 2011, the total unrecognised compensation cost (net of expected forfeitures) related to non-vested, share-based compensation awards was USD 31 million and the weighted average period over which that cost is expected to be recognised was 1.7 years.

The number of shares authorised for the Group's share-based payments to employees was 12 619 829 and 11 351 951 as of 31 December 2010 and 2011, respectively.

**Employee participation plan**

The Group's employee participation plan consists of a savings scheme lasting two or three years. Employees combine regular savings with the purchase of either actual or tracking options. The Group contributes to the employee savings over the period of the plan.

At maturity, either the employee receives shares or cash equal to the accumulated savings balance, or the employee may elect to exercise the options.

In 2010 and 2011, 656 569 and 1 878 895 options, respectively, were issued to employees and the Group contributed USD 67 million and USD 77 million, respectively, to the plan.

### 13 Compensation, participations and loans of members of governing bodies

The disclosure requirements under Swiss Company Law in respect of management compensation to the members of the Board of Directors and of the Executive Committee of the Group, as well as to closely related persons, are detailed in the Annual Report of Swiss Re Ltd.

## 14 Commitments and contingent liabilities

### Leasing commitments

As part of its normal business operations, the Group enters into a number of lease agreements. Such agreements, which are operating leases, total the following obligations for the next five years and thereafter:

As of 31 December 2011	USD millions
2012	75
2013	76
2014	71
2015	68
2016	60
After 2016	395
<b>Total operating lease commitments</b>	<b>745</b>
Less minimum non-cancellable sublease rentals	-63
<b>Total net future minimum lease commitments</b>	<b>682</b>

The following schedule shows the composition of total rental expenses for all operating leases as of 31 December (except those with terms of a month or less that were not renewed):

USD millions	2010	2011
Minimum rentals	52	60
Sublease rental income	-3	-3
<b>Total</b>	<b>49</b>	<b>57</b>

### Other commitments

As a participant in limited investment partnerships, the Group commits itself to making available certain amounts of investment funding, callable by the partnerships for periods of up to 10 years. The total commitments remaining uncalled as of 31 December 2011 were USD 1 243 million.

The Group enters into a number of contracts in the ordinary course of reinsurance and financial services business which, if the Group's credit rating and/or defined statutory measures decline to certain levels, would require the Group to post collateral or obtain guarantees. The contracts typically provide alternatives for recapture of the associated business.

### Legal proceedings

In the normal course of business operations, the Group is involved in various claims, lawsuits and regulatory matters. In the opinion of management, the disposition of these or any other legal matters is not expected to have a material adverse effect on the Group's business, consolidated financial position or results of operations.

## 15 Information on business segments

The Group provides reinsurance, insurance and capital market solutions for clients that complement its re/insurance offering throughout the world through its business segments. The business segments are determined by the organisational structure and by the way in which management reviews the operating result of the Group.

The Group presents three operating business segments: Property & Casualty, Life & Health and Asset Management. Items not allocated to these three business segments are included in the "Group items" column.

The Property & Casualty segment consists of the following sub-segments: Property traditional, Casualty traditional, Specialty traditional and Non-traditional business. The Property & Casualty business segment includes Property & Casualty insurance-linked securities, Environmental & Commodity Markets business and, in the Specialty traditional sub-segment, Credit Reinsurance, Bank Trade Finance, and Credit securitisations.

The Life & Health segment consists of the following sub-segments: Life traditional, Health traditional and Admin Re<sup>®</sup>. The Life & Health business segment includes variable annuity business and Life & Health insurance-linked securities.

The Asset Management business segment includes two separate sub-segments, Credit & Rates and Equity & Alternative Investments, resulting from the aggregation of Asset Management Risk Stripes. The Asset Management business segment includes proprietary returns on the Group's invested fixed income securities, equity securities and alternative investments.

Group items include certain costs of Corporate Centre functions not allocated to the business segments, certain foreign exchange items, interest expenses on operating and financial debt and other items not considered for the performance of the operating segments. From 1 January 2011, non-core activities which are largely in run-off (formerly presented in the business segment Legacy) are being reported within Group items. 2010 comparatives are presented accordingly.

Certain investment results, including investment income and realised gains on unit-linked business, with-profit business and reinsurance derivatives, are excluded from the performance of the Asset Management business segment and directly allocated to the Property & Casualty and Life & Health business segments.

The allocation of investment result to Property & Casualty and Life & Health is determined based on US GAAP re/insurance liabilities. The allocation methodology applies a risk-free return to the nominal net reserves at the end of the prior quarter. The risk-free interest rate applied to the reserves is determined by currency and duration of the underlying Property & Casualty and Life & Health reserves. The "Allocation" column eliminates the calculated investment result allocated to either the Property & Casualty or the Life & Health business segments.

The accounting policies of the business segments are in line with those described in the summary of significant accounting policies (see Note 1).

**Variable interest entities**

Swiss Re Group enters into arrangements with variable interest entities (VIEs) in the normal course of business. The involvement ranges from being a passive investor to designing, structuring, and managing the VIEs. The variable interests held by the Group arise as a result of the Group's involvement in a modified coinsurance agreement, certain insurance-linked and credit-linked securitisations, swaps in trusts, debt financing and other entities which meet the definition of a VIE.

When analysing the status of an entity, the Group mainly assesses if (1) the equity is sufficient to finance the entity's activities without additional subordinated financial support, (2) the equity holders have the right to make significant decisions affecting the entity's operations and (3) the holders of the voting rights substantively participate in the gains and losses of the entity. When one of these criteria is not met, the entity is considered a VIE and needs to be assessed for consolidation under the VIE section of the Consolidation Topic.

The party that has a controlling financial interest is called the primary beneficiary and consolidates the VIE. An enterprise is deemed to have a controlling financial interest if it has both of the following:

- the power to direct the activities of the VIE that most significantly impact the entity's economic performance; and
- the obligation to absorb losses of the entity that could potentially be significant to the VIE or the right to receive benefits from the entity that could potentially be significant to the VIE.

The Group assesses for all its variable interests in VIEs whether it has a controlling financial interest in these entities and, thus, is the primary beneficiary. For this, the Group identifies the activities that most significantly impact the entity's performance and determines whether the Group has the power to direct those activities. In conducting the analysis, the Group considers the purpose, the design, and the risks that the entity was designed to create and pass through to its variable interest holders. In a second step, the Group assesses if it has the obligation to absorb losses or if it has the right to receive benefits of the VIE that could potentially be significant to the entity. If both criteria are met, the Group has a controlling financial interest in the VIE and consolidates the entity.

Whenever facts and circumstances change, a review is undertaken of the impact these changes could have on the consolidation assessment previously performed. When the assessment might be impacted, a reassessment to determine the primary beneficiary is performed.

### Modified coinsurance agreement

The Group assumes insurance risk via a modified coinsurance agreement from a direct insurer which qualifies as a VIE. The Group assumes the majority of the mortality and investment risk in the VIE. In addition, the Group has the power over the investment management and policyholder administration. As these are the activities that most significantly impact the entity's economic performance, the Group qualifies as the primary beneficiary and consolidates the entity. The Group will incur losses if mortality risk or the investment returns of the entity develop unfavourably.

The total assets of the modified coinsurance vehicles in which the Group is the primary beneficiary were USD 3 473 million as of 31 December 2011.

### Insurance-linked and credit-linked securitisations

The insurance-linked and credit-linked securitisations transfer pre-existing insurance or credit risk to the capital markets through the issuance of insurance-linked or credit-linked securities. In insurance-linked securitisations, the securitisation vehicle assumes the insurance risk through insurance or derivative contracts. In credit-linked securitisations, the securitisation vehicle assumes the credit risk through credit default swaps. The securitisation vehicle generally retains the issuance proceeds as collateral. The collateral held predominantly consists of investment-grade securities.

Typically, the variable interests held by the Group arise through ownership of insurance-linked and credit-linked securities, or through protection provided under a total return swap for the principal of the collateral held by the securitisation vehicle.

Generally, the activities of a securitisation vehicle are pre-determined at formation. There are substantially no ongoing activities during the life of the VIE that could significantly impact the economic performance of the vehicle. Consequently, the main focus to identify the primary beneficiary is on the activities performed and decisions made when the VIE was designed. Typically, the Group is considered the primary beneficiary of a securitisation vehicle when the Group acts as a sponsor of risk passed to the VIE and enters at the same time in a total return swap with the VIE to protect the VIE's assets from market risk. Under the total return swap, the Group would incur losses when some or all of the securities held as collateral in the securitisation vehicle decline in value or default. Therefore, the Group's maximum exposure to loss equals the principal amount of the collateral protected under the total return swap.

As of 31 December 2011, the total assets of the insurance-linked and credit-linked securitisation vehicles in which the Group holds variable interests but is not the primary beneficiary were USD 2 587 million. The total assets of the vehicles in which the Group is the primary beneficiary were USD 730 million.

### Swaps in trusts

The Group provides risk management services to certain asset securitisation trusts which qualify as VIEs. As the involvement of the Group is limited to interest rate and foreign exchange derivatives, Swiss Re does not have power to direct any activities of the trusts and therefore does not qualify as primary beneficiary of any of these trusts. These activities are in run-off.

### Debt financing vehicles

Debt financing vehicles issue preference shares or loan notes to provide the Group with funding. The Group is partially exposed to the asset risk by holding equity rights or by protecting some of the assets held by the VIEs via guarantees or derivative contracts. The assets held by the VIEs consist of investment-grade securities, structured products, hedge fund units, derivatives and others.

The Group consolidates certain debt financing vehicles as it has power over the investment management in the vehicles, which is considered to be the activity that most significantly impacts the entities' economic performance. In addition, the Group absorbs the variability of the investment return so that both criteria for a controlling financial interest are met.

As of 31 December 2011, the total assets of the debt financing vehicles in which the Group holds variable interests but is not the primary beneficiary were USD 2 719 million. The total assets of the vehicles in which the Group is the primary beneficiary were USD 7 051 million.

### Other

The VIEs in this category were created for various purposes. Generally, the Group is exposed to the asset risk of the VIEs by holding an equity stake in the VIE or by guaranteeing a part or the entire asset value to third-party investors. A significant portion of the Group's exposure is either retroceded or hedged. The assets held by the VIEs consist mainly of private equity investments, residential real estate and other.

As of 31 December 2011, the total assets of other VIEs in which the Group holds variable interests but is not the primary beneficiary were USD 3 684 million. The total assets of the vehicles in which the Group is the primary beneficiary were USD 712 million.

The Group did not provide financial or other support to any VIEs during 2011 that it was not previously contractually required to provide.

### Consolidated VIEs

The following table shows the total assets and liabilities on the Group's balance sheet relating to VIEs of which the Group is the primary beneficiary as of 31 December:

USD millions	2010		2011	
	Carrying value	Whereof restricted:	Carrying value	Whereof restricted:
<b>Fixed income securities:</b>				
Available-for-sale	8 842	8 842	9 254	9 254
Policy loans, mortgages and other loans	596	203	191	191

<b>Total liabilities</b>	<b>12 530</b>	<b>10 421</b>	<b>9 508</b>	<b>9 508</b>

As of 31 December 2011, the consolidation of the VIEs resulted in non-controlling interests in the balance sheet of USD 414 million (31 December 2010: USD 402 million). The net non-controlling interests in income were USD 6 million and USD 12 million net of tax for 2010 and 2011, respectively.

**Non-consolidated VIEs**

The following table shows the total assets and liabilities in the Group's balance sheet related to VIEs in which the Group holds a variable interest but is not the primary beneficiary as of 31 December:

USD millions	2010	2011
<b>Fixed income securities:</b>		
Available-for-sale	60	99
Trading	9	20
Other invested assets	1 406	1 053
Premiums and other receivables	2	
Reinsurance recoverable	1 631	
Deferred acquisition costs	2	
<b>Total assets</b>	<b>3 110</b>	<b>1 172</b>
Funds held under reinsurance treaties	1 614	
Short-term debt	406	393
Accrued expenses and other liabilities	885	509
<b>Total liabilities</b>	<b>2 905</b>	<b>902</b>

The following table shows the Group's assets, liabilities and maximum exposure to loss related to VIEs in which the Group holds a variable interest but is not the primary beneficiary as of 31 December:

USD millions	2010				2011			
	Total assets	Total liabilities	Maximum exposure to loss	Difference between exposure and liabilities	Total assets	Total liabilities	Maximum exposure to loss	Difference between exposure and liabilities
Insurance-linked/ Credit-linked securitisations	1 890	1 665	2 197	532	261		1 168	1 168
Swaps in trusts	423	643	- <sup>1</sup>	-	212	316	- <sup>1</sup>	-
Debt financing	468		126	126	373		29	29
Other	329	597	1 184	587	326	586	1 152	566
<b>Total</b>	<b>3 110</b>	<b>2 905</b>	<b>-<sup>1</sup></b>	<b>-</b>	<b>1 172</b>	<b>902</b>	<b>-<sup>1</sup></b>	<b>-</b>

<sup>1</sup> The maximum exposure to loss for swaps in trusts cannot be meaningfully quantified due to their derivative character.

In 2011, an insurance-linked securitisation vehicle in which the Group held a variable interest, but was not the primary beneficiary, was restructured in order to unwind the related structure. As a result, the vehicle no longer qualified as a VIE and was consolidated as a voting interest entity from the third quarter of 2011. A further unconsolidated insurance-linked securitisation vehicle was being unwound as of end of December 2011, at which time the Swiss Re Group no longer had any variable interests in the entity. Consequently, neither vehicle was part of the VIE disclosures as of 31 December 2011.

The assets and liabilities for the swaps in trusts represent the positive and negative fair values of the derivatives the Group has entered into with the trusts.

Liabilities are recognised for certain debt financing VIEs when losses occur. To date the respective debt financing VIEs have not incurred any losses. Liabilities of USD 586 million recognised for the "Other" category relate mainly to collateral received.

This page intentionally left blank

## 17 Restructuring provision

In 2011, the Group set up total provisions of USD 26 million, related to the cost savings and efficiency programmes announced in early 2010, and released USD 7 million.

The increase of the provision in the Property & Casualty and the Life & Health business segments of USD 10 million and USD 14 million in 2011, respectively, are related to leaving benefits, office structure simplification costs and cost for the concentration of support resources allocated to the Property & Casualty and the Life & Health business segments.

Changes in restructuring provisions are disclosed in the "Other expenses" line in the Group's income statement.

For the years ended 31 December, restructuring provision developed as follows:

2010					
USD millions	Property & Casualty	Life & Health	Asset Management	Total	
Balance as of 1 January	87	24	45	156	
Increase in provision	55	27	11	93

Increase in provision	10	14	2	26	
Release of provision	-3	-1	-3	-7	
Costs incurred	-30	-17	-15	-62	
<b>Balance as of 31 December</b>	<b>37</b>	<b>1</b>	<b>16</b>	<b>54</b>	

## 18 Risk assessment

The section below follows article 663b sub-para. 12 of the Swiss Code of Obligations, which requires disclosure of the Group's performance of a risk assessment.

The Board of Directors is ultimately responsible for the Group's governance principles and policies, including approval of the Group's overall risk tolerance. The Board mainly deals with risk management through two committees:

- The Finance and Risk Committee is responsible for reviewing the Group Risk Policy and capacity limits, as well as for monitoring risk tolerance and reviewing top risk issues and exposures.
- The Audit Committee is responsible for overseeing internal controls and compliance procedures.

The Group Executive Committee (Group EC) is responsible for implementing the risk management framework through four further committees:

- The Group Risk and Capital Committee has responsibility for allocating capital and insurance risk capacity, approving investment risk limits, and determining changes to the internal risk and capital methodology.
- The Group Asset-Liability Committee oversees the management of Swiss Re's balance sheet, in particular its liquidity, capital and funding positions and related policies.
- The Group Products and Limits Committee determines Swiss Re's product policy and standards, sets reinsurance and counterparty credit risk limits, and decides on large or non-standard transactions.
- The Group Regulatory Committee is the central information and coordination platform for regulatory matters and compliance. It ensures a consistent approach to external communication on regulatory issues.

The Group Chief Risk Officer, who is a member of the Group EC, reports directly to the Group CEO as well as to the Board's Finance and Risk Committee. The Group Chief Risk Officer participates in the four committees described above and chairs both the Group Risk and Capital Committee and the Group Regulatory Committee. In addition, the Group Chief Risk Officer leads the global Risk Management function, which is responsible for risk oversight and control across the Group.

The global Risk Management function operates through dedicated units for property and casualty risk, life and health risk, and financial market and credit risk. Each unit is entrusted with Group-wide responsibility for identifying, assessing and controlling their allocated risks and for risk governance at the risk category level. The units also work closely with each other, where necessary, on transaction reviews and other cross-category issues. Actuarial management is an integral part of the insurance risk units, ensuring reserving adequacy.

Senior managers of business and corporate units are responsible for managing operational risks in their area of activity, based on a centrally coordinated methodology. Their self-assessments are reviewed and challenged by operational risk specialists in partnership with the dedicated risk management units. Risk management experts also review the Group's underwriting decision processes.

Liquidity risk, capital adequacy, and emerging risks are managed at Group level. Risk management activities that are also performed globally at Group level, across all risk categories include risk governance, risk modelling, risk reporting and the steering of the Group's regulatory activities. Swiss Re's Group Internal Audit department carries out independent, objective assessments of the adequacy and effectiveness of internal control systems. It evaluates the execution of processes within Swiss Re, including those within Risk Management.

The Compliance function is principally responsible for overseeing Swiss Re's compliance with applicable laws, regulations, rules and the Code of Conduct, as well as management of Compliance Risk. It serves to assist the Board of Directors, the Executive Committee and Management in discharging their respective duties to effectively identify, mitigate and manage Compliance Risks.

The Risk Management function continuously reviews Swiss Re's organisation in order to ensure alignment with the Group's structure.

# Report of the statutory auditor

Report of the statutory auditor  
to the General Meeting of  
Swiss Re Ltd  
Zurich

## **Report of the statutory auditor on the Consolidated Financial Statements**

As statutory auditor, we have audited the consolidated financial statements of Swiss Re Group, which comprise the income statement, balance sheet, statement of shareholders' equity, statement of comprehensive income, statement of cash flow and notes (pages 111 to 195), for the year ended 31 December 2011.

## **Board of Directors' Responsibility**

The Board of Directors is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America (US GAAP) and the requirements of Swiss law. This responsibility includes designing, implementing and maintaining an internal control system relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error. The Board of Directors is further responsible for selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

## **Auditor's Responsibility**

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Swiss law, Swiss Auditing Standards and auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers the internal control system relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control system. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of accounting estimates made, as well as evaluating the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

## **Opinion**

In our opinion, the consolidated financial statements for the year ended 31 December 2011 present fairly, in all material respects, the financial position, the results of operations and the cash flows in accordance with accounting principles generally accepted in the United States of America (US GAAP) and comply with Swiss law.

**Report on other legal requirements**

We confirm that we meet the legal requirements on licensing according to the Auditor Oversight Act (AOA) and independence (article 728 CO and article 11 AOA) and that there are no circumstances incompatible with our independence.

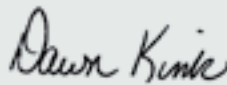

In accordance with article 728a paragraph 1 item 3 CO and Swiss Auditing Standard 890, we confirm that an internal control system exists which has been designed for the preparation of consolidated financial statements according to the instructions of the Board of Directors.

We recommend that the consolidated financial statements submitted to you be approved.

# Annual Report

## Swiss Re Ltd

### Holding company

Swiss Re Ltd (the Company), domiciled in Zurich, Switzerland, is the ultimate holding company of the Swiss Re Group. Its principal activity is the holding of investments in Swiss Re Group companies.

Swiss Re Ltd was incorporated on 2 February 2011 with a share capital of CHF 100 000 and established as the new holding company of the Swiss Re Group through an exchange offer. Swiss Reinsurance Company Ltd shareholders were offered the opportunity to exchange their shares in Swiss Reinsurance Company Ltd for shares in Swiss Re Ltd on a one-for-one basis. Effective 20 May 2011, Swiss Re Ltd became the ultimate holding company of the Swiss Re Group and was listed on the SIX Swiss Exchange. Holders of Swiss Re Ltd shares had the same beneficial ownership interests before and after the exchange offer.

Upon completion of the exchange offer on 12 December 2011, Swiss Re Ltd had a total of 370 706 931 shares issued with a par value of CHF 0.10, and its fully paid-in share capital amounted to CHF 37 070 693. The former Swiss Reinsurance Company Ltd shares were delisted from the SIX Swiss Exchange on 8 December 2011.

### Financial year 2011

The after-tax net income for the 2011 financial year amounted to CHF 19 million and was driven by income from trademark license fees of CHF 140 million, offset by valuation adjustments and realised losses on sales of own shares of CHF 33 million, administrative expenses of CHF 39 million, other expenses of CHF 47 million (including a donation to the newly established Swiss Re Foundation of CHF 40 million), and income tax expense of CHF 2 million.

### Assets

Total assets amounted to CHF 18 281 million.

As of 31 December 2011, Swiss Re Ltd held investments in Swiss Re Group companies with a total amount of CHF 17 502 million, consisting of a 92.8% direct interest in Swiss Reinsurance Company Ltd of CHF 17 501 million and a 100% direct interest in Swiss Re Specialised Investments Holdings (UK) Ltd of CHF 1 million.

Receivables from subsidiaries and affiliated companies reflected balances related to trademark license fees.

### Liabilities

Total liabilities amounted to CHF 13 million and included payables for services provided by Swiss Reinsurance Company Ltd of CHF 9 million and a provision for taxation of CHF 4 million.

### Shareholders' equity

As of 31 December 2011, shareholders' equity amounted to CHF 18 268 million.

The Swiss Federal Tax Administration has confirmed that in the context of the establishment of Swiss Re Ltd as the Swiss Re Group's new ultimate holding company, the amount of legal reserves from capital contributions of CHF 8 819 million held by the former ultimate holding company Swiss Reinsurance Company Ltd can also be considered as legal reserves from capital contributions for Swiss Re Ltd.

As of 31 December 2011, Swiss Re Ltd's legal reserves from capital contributions amounted to CHF 8 995 million reflecting the inclusion of additional reserves from newly issued shares and a reclassification from other reserves to legal reserves from capital contributions of issuance costs related to capital increases in previous years. Under current Swiss tax legislation, the amount of legal reserves from capital contributions, which has been confirmed by the Swiss Federal Tax Administration, can be paid out as dividends exempt from Swiss withholding tax.

## Swiss Re Ltd

Significant accounting principles

### **Basis of presentation**

The financial statements are prepared in accordance with Swiss Company Law.

### **Time period**

As Swiss Re Ltd was incorporated on 2 February 2011, the financial year comprises the accounting period from 2 February 2011 to 31 December 2011.

### **Use of estimates in the preparation of annual accounts**

The preparation of the annual accounts requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses as well as the related disclosures. Actual results could differ from these estimates.

### **Foreign currency translation**

Assets and liabilities denominated in foreign currencies are converted into Swiss francs at year-end exchange rates with the exception of investments in subsidiaries and affiliated companies which are maintained in Swiss francs at historical exchange rates.

Revenues and expenses are converted into Swiss francs at the average exchange rates for the reporting year.

All exchange rate differences arising from the revaluation of the opening balance sheet, the adjustments from application of year-end or average rates and foreign exchange transactions are booked to the provision for currency fluctuation. Recognition through the income statement only occurs when the provision is not sufficient to absorb a negative difference.

### **Cash and cash equivalents**

Cash and cash equivalents include cash at bank, short-term deposits and certain short-term deposits in money-market funds with an original maturity of three months or less. Such current assets are held at nominal value.

### **Short-term investments**

Short-term investments contain investments with an original maturity between three months and one year. Such investments are carried at amortised cost.

### **Receivables from subsidiaries and affiliated companies / Other receivables**

These assets are carried at nominal value. A value adjustment is recorded if the expected recovery value is lower than the nominal value.

### **Accrued income**

Accrued income includes other expenditures incurred during the financial year but relating to a subsequent financial year, and revenues relating to the current financial year but which are receivable in a subsequent financial year.

### **Investments in subsidiaries and affiliated companies**

These assets are carried at cost, less necessary and legally permissible depreciation.

### **Own shares**

Own shares are carried at cost, less necessary and legally permissible depreciation.

### **Payables to subsidiaries and affiliated companies / Other short-term liabilities**

These liabilities are carried at nominal value.

### **Accrued expenses**

Accrued expenses consist of both income received before the balance sheet date but relating to a subsequent financial year, and charges relating to the current financial year but which are payable in a subsequent financial year.

**Long-term liabilities**

The provision for taxation represents an estimate of taxes payable in respect of the reporting year.

The provision for currency fluctuation comprises all currency differences arising from the revaluation of the opening balance sheet, the adjustments from application of year-end or average rates and foreign exchange transactions.

**Dividends from subsidiaries and affiliated companies**

Dividends from subsidiaries and affiliated companies are recognised as revenue in the year in which they are declared.

**Capital and indirect taxes**

Capital and indirect taxes related to the financial year are included in other expenses. Value-added taxes are included in the respective expense lines in the income statement.

**Income tax expense**

As a holding company incorporated in Switzerland, Swiss Re Ltd is exempt from income taxation at cantonal/communal level. On federal level, dividends from subsidiaries and affiliated companies are indirectly exempt from income taxation (participation relief). However, income tax is payable on trademark license fees charged to certain subsidiaries and affiliated companies.

## Swiss Re Ltd

Additional information on the financial statements

### 1 Shareholders' equity transactions

CHF millions	2011
Shareholders' equity as of incorporation on 2 February 2011	0
Capital increase dated 20 May 2011	15 927
Capital increase dated 10 June 2011	1 965
Capital increase dated 12 December 2011	357
Net income for the financial year	19
<b>Shareholders' equity as of 31 December 2011</b>	<b>18 268</b>

Swiss Re Ltd was founded by Swiss Reinsurance Company Ltd on 2 February 2011 with an initial share capital of CHF 100 000 (rounded to CHF 0 million in the table above) and became the ultimate holding company of the Swiss Re Group on 20 May 2011. As per the contribution in kind agreement of 2 February 2011, the initial capital was contributed to Swiss Re Ltd by means of 1 000 000 Swiss Reinsurance Company Ltd shares with a nominal value of CHF 0.10 per share.

On 20 May 2011, Swiss Re Ltd received by way of contribution in kind 24 863 366 Swiss Reinsurance Company Ltd shares at a total book value of CHF 708 919 518 and 297 520 330 publicly held Swiss Reinsurance Company Ltd shares at a total contribution value of CHF 15 218 164 880 against issuance of 322 383 696 Swiss Re Ltd shares with a par value of CHF 0.10 per share.

On 10 June 2011, Swiss Re Ltd received by way of contribution in kind 600 000 Swiss Reinsurance Company Ltd shares at a total book value of CHF 29 430 000 and 39 450 613 publicly held Swiss Reinsurance Company Ltd shares at a total contribution value of CHF 1 935 052 568 against issuance of 40 050 613 Swiss Re Ltd shares with a par value of CHF 0.10 per share.

On 12 December 2011, Swiss Re Ltd received by way of contribution in kind 171 000 Swiss Reinsurance Company Ltd shares at a total book value of CHF 8 385 840 and 7 101 622 publicly held Swiss Reinsurance Company Ltd shares at a total contribution value of CHF 348 263 543 against issuance of 7 272 622 Swiss Re Ltd shares with a par value of CHF 0.10 per share. These shares were exchanged in the context of the squeeze-out and compensation of the minority shareholders of Swiss Reinsurance Company Ltd.

In connection with the exchange offer, Swiss Reinsurance Company Ltd contributed all its treasury shares to Swiss Re Ltd in exchange for an equivalent number of new Swiss Re Ltd shares. The total of contributed shares was 26 654 366, including 20 000 Swiss Reinsurance Company Ltd shares that were contributed by a third party on behalf of Swiss Reinsurance Company Ltd. Based on two share swap agreements between Swiss Re Ltd and Swiss Reinsurance Company Ltd, these Swiss Reinsurance Company Ltd shares were swapped back on 17 June 2011 and on 14 December 2011, respectively. The swaps were executed at book values of the underlying shares on these dates.

## 2 Compensation, participations and loans of members of governing bodies

The section below is in line with articles 663b<sup>bis</sup> and 663c para. 3 of the Swiss Code of Obligations, which require disclosure of the elements of compensation paid to Swiss Re's Board of Directors and Group Executive Committee (Group EC), as well as their shareholdings and loans.

### Compensation for acting members of governing bodies

Article 663b<sup>bis</sup> of the Swiss Code of Obligations requires disclosure of total compensation paid to members of the Board of Directors and the Group EC. Compensation to members of the Board of Directors and the highest paid members of the Group EC are shown by individual. For a description of the elements of this compensation, see page 96, Compensation.

### Compensation of the Group EC

Aggregate compensation for members of the Group EC was:

CHF thousands	8 members 2010	9 members 2011
Base salary and allowances	8 499	10 687
Funding of pension benefits	1 215	1 397
<b>Total fixed compensation</b>	<b>9 714</b>	<b>12 084</b>
Cash Annual Performance Incentive	6 906	9 573
Incentive Shares	3 929	
Value Alignment Incentive (VAI)	8 987	5 378
Long-term incentives (LTI/LPP) <sup>1</sup>	10 774	6 250
<b>Total variable compensation</b>	<b>30 596</b>	<b>21 201</b>
<b>Total fixed and variable compensation</b>	<b>40 310</b>	<b>33 285</b>
Compensation due to member leaving		1 448
<b>Total compensation</b>	<b>40 310</b>	<b>34 733</b>

<sup>1</sup> During 2011, the Group reviewed the existing long-term incentive scheme, the LTI, and in March 2012 a new long-term incentive plan, the LPP, was awarded. The disclosure in the table above reflects awards granted in a compensation cycle. Thus the 2010 value reflects the fair value of the LTI awards granted in March 2011 while the 2011 value reflects the fair value of the LPP awards granted in March 2012. Furthermore, the values disclosed exclude the LPP granted in March 2012 of CHF 2.5 million for the incoming Group CEO, given he was not a member of the Group EC until 1 February 2012.

The table above covers payments to eight members in 2010, including the Group CEO, compared to nine members in 2011. This also takes into account changes in the composition of the Group EC.

The fair value of the Value Alignment Incentive (VAI) is based on the nominal amount of the grant (grants in 2011, shown in the table above in 2010, also included a mark-up of 15%). Subsequently, a disbursement factor is applied based on the economic results of the Group which can vary between 50% and 150%. The VAI disclosed in the table above assumes a disbursement factor of 100% at grant date. For a description of the VAI plan see page 98, Compensation.

Amounts reported under Incentive Shares relate to restricted shares granted. Like all Swiss Re employees, the Group CEO and Group EC members may elect to receive a combination of cash and incentive shares as part of their variable compensation; the shares granted are subject to a one-year blocking period.

During 2011, the Compensation Committee of the Board of Directors reviewed the existing Long Term Incentive plan (LTI) and in March 2012, LTI was replaced by a new plan, the Leadership Performance Plan (LPP).

The LTI plan granted in 2011 is expected to be settled in shares, and the requisite service period as well as the maximum contractual term are three years. The plan is based on a payout factor driven by average RoE and average EPS over a three-year period. The payout ratio can vary between 0 and 2 and the final payment will depend on whether the performance targets have been achieved over the plan period. The fair value of the 2010 grant is based on a stochastic model, which considers the likelihood of achieving performance targets and the impact of dividends.

The LPP granted in 2012 is expected to be settled in shares, and the requisite service as well as the maximum contractual term are three years. At grant the award is split into two equal underlying components, a Restricted Share Unit (RSU) and a Performance Share Unit (PSU). The RSU component is measured against a RoE performance condition and will vest within a range of 0–100%. The PSU is based on relative total shareholder return, measured against a pre-defined basket of peers and will vest within a range of 0–200%. The fair values of both components are measured separately, based on stochastic models. For further information on the LPP award, see page 99.

For US GAAP and statutory reporting purposes, the cost of the incentive shares, VAI and long-term incentives awards are accrued over the period during which they are earned. For the purpose of the disclosure required of this note, the value of awards granted are included as compensation in the year of performance.

Certain members of the Group EC and the Board of Directors participate in a defined contribution scheme and their pension funding compensation in the remuneration table above reflects the actual employer contributions. Where defined benefit arrangements exist, the funding is determined on an actuarial basis, which can vary substantially from year to year depending on age and years of service of the benefiting members.

#### Highest paid member of the Group EC

In 2010 and 2011, Stefan Lippe, Group CEO, was the highest paid member of the Group EC. His respective compensation was:

Stefan Lippe, Group CEO		
CHF thousands	2010	2011
Base salary and allowances	1 783	2 180
Funding of pension benefits	172	175
<b>Total fixed compensation</b>	1 955	<b>2 355</b>
Cash Annual Performance Incentive		3 000
Incentive Shares	1 875	
Value Alignment Incentive (VAI) <sup>1</sup>	2 156	
Long-term incentives (LTI/LPP) <sup>2</sup>	2 693	
<b>Total variable compensation</b>	6 724	<b>3 000</b>
<b>Total compensation<sup>3</sup></b>	8 679	<b>5 355</b>

<sup>1</sup> For 2010, the value includes a mark-up of 15% on nominal value which will be paid out at vesting after three years. For 2011, the termination agreement of the Group CEO provides that no portion of the Annual Performance Incentive be deferred to VAI.

<sup>2</sup> During 2011, the Group reviewed the existing long-term incentive scheme, the LTI, and in March 2012 a new long-term incentive plan, the LPP, was awarded. The disclosure in the table above reflects awards granted in a compensation cycle. Thus the 2010 value reflects the fair value of the LTI awards granted in March 2011 while the 2011 value reflects the fair value of the LPP awards granted in March 2012.

<sup>3</sup> The termination agreement of the Group CEO does not provide for any severance payment.

### Compensation of the Board of Directors

In 2010, the Chairman and Vice Chairman received half of their fees in the form of a three-year performance share plan and the balance in cash. In 2011, the Chairman and Vice Chairman received 40% of their fees in shares, which have a four-year deferral period. The remaining members of the Board of Directors receive a mandatory 40% of their fees in shares, which have a four-year deferral period and the balance in cash.

The performance share plan is measured against total relative shareholder return (TSR). The 2009 and 2010 performance shares were granted at a reference price of CHF 36.00 and CHF 53.60, respectively. The final number of shares to be released after three years can vary between 0% and 150% depending on the relative total shareholder return against a peer group. The Group did not grant a performance share plan in 2011.

The share prices as of 6 April 2010 of CHF 53.60 and as of 14 April 2011 of CHF 54.05 were used for calculating the number of shares awarded to the remaining members of the Board of Directors based on the amount of the fee received in shares for 2010 and 2011 grants, respectively.

Aggregate compensation for the members of the Board of Directors was:

CHF thousands	2010	2011
Fees and allowances in cash	6 781	7 047
Fees in blocked shares	1 592	4 678
Performance shares	4 500	
<b>Total</b>	<b>12 873</b>	<b>11 725</b>

Individual compensation for the Chairman and the Vice Chairman of the Board of Directors was:

Walter B. Kielholz, Chairman CHF thousands	2010	2011
Fees and allowances in cash	2 889	2 892
<b>Total cash</b>	<b>2 889</b>	<b>2 892</b>
Fees in blocked shares		1 912
Performance shares	3 000	
<b>Total</b>	<b>5 889</b>	<b>4 804</b>

Mathis Cabiavetta, Vice Chairman CHF thousands	2010	2011
Fees and allowances in cash	1 500	1 434
<b>Total cash</b>	<b>1 500</b>	<b>1 434</b>
Fees in blocked shares		956
Performance shares	1 500	
<b>Total</b>	<b>3 000</b>	<b>2 390</b>

Individual compensation of the remaining members of the Board of Directors was:

<sup>1</sup> Elected to Swiss Re's Board of Directors at the Annual General Meeting of 15 April 2011.

### Compensation of former members of governing bodies

In 2010, a total of CHF 1 148 thousand was paid to former members of the Group EC. This figure relates to three individuals and covers company commitments which arose following the retirement of the respective executives. In 2011, a total of CHF 175 thousand was paid to former members of the Group EC. This figure relates to one individual and covers company taxation commitments.

### Group EC and Board of Directors share ownership, options and related instruments

#### Share ownership

The disclosure below is in line with article 663c para. 3 of the Swiss Code of Obligations, which requires disclosure of share ownership, options and related instruments individually for each member of the Board of Directors and the Group EC, including shares, options and related instruments held by persons closely related to, and by companies controlled by members of the Board of Directors and the Group EC.

Number of shares held as of 31 December were:

Members of the Group EC	2010	2011
Stefan Lippe, Group CEO	66 121	201 733
David J. Blumer, Group Chief Investment Officer	54 000	81 000

Carlos E. Represas, Member <sup>2</sup>	3 502	5 538
Jean-Pierre Roth, Member <sup>3</sup>	1 129	3 350
Robert A. Scott, Chairman of the Compensation Committee	20 395	24 096
<b>Total</b>	<b>412 239</b>	<b>498 802</b>

<sup>1</sup> Elected to Swiss Re's Board of Directors at the Annual General Meeting of 15 April 2011.

<sup>2</sup> Elected to Swiss Re's Board of Directors at the Annual General Meeting of 7 April 2010.

<sup>3</sup> Elected to Swiss Re's Board of Directors at the Annual General Meeting of 7 April 2010, effective 1 July 2010.

### Restricted shares

Swiss Re grants restricted shares on an ad hoc basis which are subject to a vesting period with a risk of forfeiture during the vesting period.

The following unvested restricted shares were held by members of the Group EC as of 31 December:

Members of the Group EC	2010	2011
Weighted average share price in CHF as of grant date	28.66	<b>16.74</b>
David J. Blumer, Group Chief Investment Officer	176 342	149 342
Raj Singh, Former Group Chief Risk Officer <sup>1</sup>	4 000	
<b>Total</b>	<b>180 342</b>	<b>149 342</b>

<sup>1</sup> Stepped down from the Group EC effective 28 February 2011.

The restricted shares granted to David J. Blumer, Group Chief Investment Officer, have a three-year vesting period. For the years ended 31 December 2010 and 2011, the members of the Board of Directors did not hold any restricted shares.

### Performance shares

Up until 2010, the Chairman and the Vice Chairman received half of their fees in the form of a performance share plan with a three-year vesting period. The Group did not grant a further plan in 2011.

Number of performance units outstanding as of 31 December 2010 and 2011 were:

Members of the Board of Directors	2010	2011
Walter B. Kielholz, Chairman	125 415	125 415
Mathis Cabiallavetta, Vice Chairman	69 653	69 653
<b>Total</b>	<b>195 068</b>	<b>195 068</b>

### Vested options

The following vested options were held by members of Group governing bodies as of 31 December:

Members of the Group EC	2010	Number of options 2011
Weighted average strike price in CHF as of grant date	109.13	<b>99.90</b>
Stefan Lippe, Group CEO	99 000	99 000
Brian Gray, Group Chief Underwriting Officer	17 000	14 000
Michel M. Liès, Former Group Chief Marketing Officer <sup>1</sup>	114 000	
Christian Mumenthaler, CEO Reinsurance <sup>2</sup>		2 000
George Quinn, Group CFO	42 000	31 000
<b>Total</b>	<b>272 000</b>	<b>146 000</b>

<sup>1</sup> Stepped down from the Group EC in December 2010.

<sup>2</sup> Appointed to the Group EC in January 2011.

Members of the Board of Directors	2010	Number of options 2011
Weighted average strike price in CHF as of grant date	121.81	<b>103.98</b>
Walter B. Kielholz, Chairman	170 000	110 000
John R. Coomber, Chairman of the Finance and Risk Committee	290 000	250 000
<b>Total</b>	<b>460 000</b>	<b>360 000</b>

The range of expiry years for vested options held by members of Group governing bodies as of 31 December 2010 and 2011 was 2011–2015 and 2012–2015, respectively.

**Loans to members of governing bodies**

The following loans were granted to members of governing bodies as of 31 December:

CHF thousands	2010	2011
Total mortgages and loans to members of the Group EC	6 169	3 753
Highest mortgages and loans to an individual member of the Group EC:		
Christian Mumenthaler, CEO Reinsurance		2 167
Raj Singh, Former Group Chief Risk Officer <sup>1</sup>	3 596	
Total mortgages and loans not at market conditions to former members of the Group EC	7 298	9 610
Mortgages and loans to members of the Board of Directors		
Walter B. Kielholz, Chairman	2 000	2 000

<sup>1</sup> Stepped down from the Group EC effective 28 February 2011.

All credit is secured against real estate or pledged shares. The terms and conditions of loans and mortgages are the same as those available to all Swiss Re Group employees in the respective locations. In 2010 and 2011, all mortgages held by members of governing bodies were granted at Swiss terms and conditions. Fixed-rate mortgages have a maturity of five years and interest rates that correspond to the five-year Swiss franc swap rate plus a margin of 10 basis points. The variable-rate mortgages have no agreed maturity dates. The basic preferential interest rates equal the corresponding interest rates applied by the Zurich Cantonal Bank minus one percentage point. To the extent that fixed or adjustable interest rates are preferential, such values were factored into the compensation sums given to the governing body members.

### 3 Investment income and expenses

### 4 Further notes to the financial statements

#### Personnel information and administrative expenses

Swiss Re Ltd is managed by certain employees of Swiss Reinsurance Company Ltd and has no employees of its own. Therefore, Swiss Re Ltd is charged for administrative expenses by Swiss Reinsurance Company Ltd.

#### Investments in subsidiaries and affiliated companies

As of 31 December 2011, Swiss Re Ltd held the following investments in subsidiaries and affiliated companies:

2011 Company	Domicile	Affiliation	Share capital
Swiss Reinsurance Company Ltd	Zurich	100% <sup>1</sup>	CHF 37.1 million
Swiss Re Specialised Investments Holdings (UK) Ltd	London	100%	GBP 1.0 million

<sup>1</sup> As of 31 December 2011, Swiss Re Ltd held directly 92.8% and through Swiss Reinsurance Company Ltd indirectly 7.2% (treasury shares). These treasury shares are subject to cancellation in 2012.

#### Own shares

As of 31 December 2011, Swiss Re Ltd and its subsidiaries held 28 022 301 of Swiss Re Ltd's own shares, of which Swiss Re Ltd owned directly 26 005 015 shares.

In connection with the exchange offer Swiss Reinsurance Company Ltd contributed all its treasury shares to Swiss Re Ltd in exchange for an equivalent number of new Swiss Re Ltd shares. The total of contributed shares was 26 654 366, including 20 000 Swiss Reinsurance Company Ltd shares that were contributed by a third party on behalf of Swiss Reinsurance Company Ltd, with a total book value of CHF 747 830 958. This book value consisted of 11 678 802 shares contributed with a par value of CHF 0.10 per share and 14 975 564 shares contributed with an average price of CHF 49.86 per share.

In the year under report, 27 467 544 own shares were purchased at an average price of CHF 42.48 and 27 957 243 own shares were sold at an average price of CHF 39.57.

Swiss Re Ltd donated 649 351 Swiss Re shares to the newly established Swiss Re Foundation, at a price of CHF 46.20 per share.

## Major shareholders

As of 31 December 2011, there were six shareholders with a participation exceeding the 3% threshold of Swiss Re Ltd's share capital:

Shareholder	Number of shares	% of voting rights and share capital	Creation of the obligation to notify
Berkshire Hathaway Inc.	11 262 000	3.10	10 June 2011
BlackRock, Inc.	11 134 246	3.09	26 September 2011
Dodge & Cox	12 639 368	3.48	10 June 2011
Franklin Resources, Inc.	18 658 754	5.13	3 August 2011
MFS Investment Management	11 485 890	3.16	10 June 2011

In addition, Swiss Re Ltd held, as of 31 December 2011, directly and indirectly 28 022 301 own shares, representing 7.56% of voting rights and share capital. Swiss Re Ltd cannot exercise the voting rights of own shares held.

## Conditional capital and authorised capital

As of 31 December 2011, Swiss Re Ltd had the following conditional capital and authorised capital:

### Conditional capital for Equity-Linked Financing Instruments

The share capital of the Company shall be increased by an amount not exceeding CHF 5 000 000 through the issuance of a maximum of 50 000 000 registered shares, payable in full, each with a nominal value of CHF 0.10 through the voluntary or mandatory exercise of conversion and/or option rights granted in connection with bonds or similar instruments including loans or other financial instruments by the Company or Group companies (hereinafter collectively the "Equity-Linked Financing Instruments"). Existing shareholders' subscription rights are excluded.

### Authorised capital

The Board of Directors is authorised to increase the share capital of the Company at any time up to 20 May 2013 by an amount not exceeding CHF 8 500 000 through the issuance of up to 85 000 000 registered shares, payable in full, each with a nominal value of CHF 0.10. Increases by underwriting as well as partial increases are permitted. The date of issue, the issue price, the type of contribution and any possible acquisition of assets, the date of dividend entitlement as well as the expiry or allocation of non exercised subscription rights will be determined by the Board of Directors.

With respect to a maximum of CHF 5 000 000 through the issuance of up to 50 000 000 registered shares, payable in full, each with a nominal value of CHF 0.10 out of the total amount of authorised capital referred to above, the subscription rights of shareholders may not be excluded.

With respect to a maximum of CHF 3 500 000 through the issuance of up to 35 000 000 registered shares, payable in full, each with a nominal value of CHF 0.10 out of the total amount of authorised capital referred to above, the Board of Directors may exclude or restrict the subscription rights of the existing shareholders for the use of shares in connection with (i) mergers, acquisitions (including take-over) of companies, parts of companies or holdings, equity stakes (participations) or new investments planned by the Company and/or Group companies, financing or re-financing of such mergers, acquisitions or new investments, the conversion of loans, securities or equity securities, and/or (ii) improving the regulatory capital position of the Company or Group companies in a fast and expeditious manner if the Board of Directors deems it appropriate or prudent to do so (including by way of private placements).

### Authorised capital for the exchange of shares

The Board of Directors is authorised to increase the share capital of the Company for the use as consideration for any remaining minority shareholders of Swiss Reinsurance Company Ltd for any voluntary or mandatory surrendering of their shares in Swiss Reinsurance Company Ltd after the execution of the public exchange offer of the Company at any time up to 20 May 2013 by an amount not exceeding CHF 4 005 061 through the issuance of up to 40 050 613 registered shares, payable in full, each with a nominal value of CHF 0.10. Increases by underwriting as well as partial increases are permitted. The date of issue, the issue price, the type of contribution and any possible acquisition of assets as well as the date of dividend entitlement will be determined by the Board of Directors. The subscription rights of the existing shareholders for registered shares issued according to above are excluded.

### **Legal reserves from capital contributions**

As of 31 December 2011, legal reserves from capital contributions amounted to CHF 8 995 million, thereof CHF 8 819 million have been confirmed by the Swiss Federal Tax Administration. Under current Swiss tax legislation, this confirmed amount of legal reserves from capital contributions can be paid out as dividends exempt from Swiss withholding tax.

### **Risk assessment**

Article 663b sub-para. 12 of the Swiss Code of Obligations requires disclosure of information on the performance of a risk assessment.

The identification, assessment and control of risk exposures of Swiss Re Ltd on a stand-alone basis are integrated in and covered by Swiss Re's Group risk management organisation and processes.

Details are disclosed on page 194.

### **Outlook 2012**

As a result of the new Swiss Re Group corporate structure, during the first half of 2012, Swiss Reinsurance Company Ltd will transfer its investments in Swiss Re Corporate Solutions Ltd and Swiss Re Life Capital Ltd through a dividend in-kind to Swiss Re Ltd. These transfers are subject to the approval of Swiss Re's principal regulator, Swiss Financial Market Supervisory Authority FINMA. Following these transfers, Swiss Re Corporate Solutions Ltd and Swiss Re Life Capital Ltd will no longer be subsidiaries of Swiss Reinsurance Company Ltd and will instead become direct subsidiaries of Swiss Re Ltd.

# Proposal for allocation of disposable profit

The Annual General Meeting to be held in Zurich on 13 April 2012 has at its disposal the following profit:

in CHF	2011
Retained earnings brought forward	–
Net income for the financial year	<b>18 976 524</b>
<b>Disposable profit</b>	<b>18 976 524</b>

Share structure	Number of registered shares	Nominal capital in CHF
For the financial year 2011:		
eligible for dividend	342 736 499	<b>34 273 650</b>
not eligible for dividend	27 970 432	<b>2 797 043</b>
<b>Total shares issued</b>	<b>370 706 931</b>	<b>37 070 693</b>

The Board of Directors proposes to the Annual General Meeting to allocate the disposable profit and to pay a dividend as follows:

in CHF	2011
Allocation to other reserves	–
Reclassification of legal reserves from capital contributions to other reserves	<b>-1 028 209 497<sup>1</sup></b>
Dividend payment out of other reserves	<b>1 028 209 497<sup>1</sup></b>
Balance carried forward	<b>18 976 524</b>
<b>Disposable profit</b>	<b>18 976 524</b>

<sup>1</sup> The Board of Directors' proposal to the Annual General Meeting of 13 April 2012, subject to the actual number of shares outstanding and eligible for dividend.

## Dividend

If the Board of Directors' proposal for allocation of disposable profit is accepted, a dividend of CHF 3.00 per share will be paid from other reserves.

The dividend will be paid exempt from Swiss withholding tax of 35% on 20 April 2012 by means of dividend order to shareholders recorded in the Share Register or to their deposit banks.

Zurich, 15 March 2012

# Report of the statutory auditor

Report of the statutory auditor  
to the General Meeting of  
Swiss Re Ltd  
Zurich

## **Report of the statutory auditor on the Financial Statements**

As statutory auditor, we have audited the financial statements of Swiss Re Ltd, which comprise the income statement, balance sheet and notes (pages 201 to 216), for the period from incorporation on 2 February 2011 to 31 December 2011.

### *Board of Directors' responsibility*

The Board of Directors is responsible for the preparation of the financial statements in accordance with the requirements of Swiss law and the company's articles of incorporation. This responsibility includes designing, implementing and maintaining an internal control system relevant to the preparation of financial statements that are free from material misstatement, whether due to fraud or error. The Board of Directors is further responsible for selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

### *Auditor's responsibility*

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Swiss law and Swiss Auditing Standards. Those standards require that we plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers the internal control system relevant to the entity's preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control system. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of accounting estimates made, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### *Opinion*

In our opinion, the financial statements for the period from incorporation on 2 February 2011 to 31 December 2011 comply with Swiss law and the company's articles of incorporation.

**Report on other legal requirements**

We confirm that we meet the legal requirements on licensing according to the Auditor Oversight Act (AOA) and independence (article 728 CO and article 11 AOA) and that there are no circumstances incompatible with our independence.

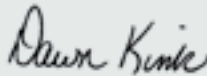

In accordance with article 728a paragraph 1 item 3 CO and Swiss Auditing Standard 890, we confirm that an internal control system exists which has been designed for the preparation of financial statements according to the instructions of the Board of Directors.

We further confirm that the proposal for allocation of disposable profit complies with Swiss law and the company's articles of incorporation. We recommend that the financial statements submitted to you be approved.
